notify the
collection centre
and pharmacy by
phone.
Also notify
Britannia
Haematologist

1. Collection centre need to bring in patient for twice weekly monitoring. Best to get bloods analysed locally.

2. Consultant should be made aware of the situation.

3. Normal monitoring can resume once patient produces a green result.

It is vital that the primary contacts for every patient are kept updated – in case of adverse events.

1. Collection centre are made aware of the amber result via phone.

2. Pharmacy is made aware via phone. Fax amber letter to pharmacy.

3. Amber letter faxed and posted to the patients consultant.
