Patient Information Leaflet

Shining a light on the future

This leaflet explains what a Community Mental Health Team (CMHT) is, and how it might help you.

Community Mental Health Team

Community Mental Health Teams provide a wide range of support for people seeking specialist advice for a mental health difficulty. The majority of people we support are 65 or older, although we do see people younger, depending on the reason for the referral.

We work with people who need more specialist or intensive help than their GP or other health worker is able to give. The teams consist of a range of specially trained staff with different roles and expertise. You will see the person best able to assist you at the appropriate time.

The area where you live will determine which CMHT will provide your care. We cover three areas:

- Newcastle
- Sunderland
- South Tyneside

How does the CMHT work?

If you, your family, your GP or another professional feels that you might benefit from our help they will contact us to arrange an appointment for you. If we can help, a member of the team will see you either at your home or as an outpatient as soon as possible.

We try to see all new patients as soon as possible after receiving a referral dependent upon need.

At the first appointment, we will discuss with you the problems you are experiencing and the best way to help you. You may be offered further help, either by the person who assessed you, or by another member of the team. The help we offer may include:

- Specialist assessments
- Psychological intervention/talking therapies
- Medication management
- Diagnosis and treatment of dementia
- Support, advice and health information
- Carer support for family members
- Linking with your GP and other services as necessary

Contact details and emergency phone numbers

We have single point of contact telephone numbers.
