NORTHUMBERLAND, TYNE AND WEAR NHS FOUNDATION TRUST

BOARD OF DIRECTORS

Meeting Date: 25 March 2015

Title and Author of Paper: Performance Report (Month 11). Lisa Quinn, Executive Director of Performance & Assurance

Paper for Debate, Decision or Information: Information

Key Points to Note:

- Monitor Risk Assessment Framework - Governance risk rating Green (lowest risk) and Continuity of Services Risk Rating of 3 **(pages 3 & 4)**

- NHS Outcomes Framework – the dashboard is intended to bring together local and national data to allow NTW to benchmark and improve the quality of services we provide. Data reported is as at quarter 3 **(page 5)**

- Quality Dashboard – at M11 the trust continues to have full compliance with all of the CQC essential outcomes of quality and safety (**page 6).** All CQUIN have been rated Green for M11 with the exception of Physical Health and CYPS Waiting Times due to the amount of effort required in both areas to achieve end of year targets. The carers CQUIN has also been rated amber in month 11 due to slight delays in completion of Q3 work however the year end forecast is green.

- Serious Incidents – there were 3 Serious Incidents reported in Month 11 which is an decrease from 10 the previous month **(page 6)**

- Complaints – there were 18 complaints received in Month 11 which is a decrease from 27 the previous month **(page 6)**

- Waiting Times – a waiting times dashboard is included within the report (nb waiting times data will be provided at CCG level from April 2015 onwards) **(page 7)**

- Workforce Dashboard – JDR/PDP rates have decreased to 78.6% (80.3% last month) and remain below the expected minimum of 90%. Sickness absence has decreased to 6.25% in February 2015 from 7.27% the previous month **(page 8)**

- Finance Dashboard - At Month 11, the Trust had a risk rating of 3 and a surplus before exceptional items of £5.5m which was £4.0m ahead of plan. It is also forecasting a year-end surplus before exceptional items of £4.6m which is £3.5m ahead of plan. However, the Trust is still facing some key financial pressures including forecast in-patient staffing overspends in Urgent Care (£3.1m) and overspends on medical staffing (£0.6m) as well as a forecast in-year shortfall on savings required from the Financial Delivery Programme (£1.8m). These pressures are currently being offset by non-recurring underspends. **(page 9)**

- Contract performance – dashboard summaries are provided for each contract highlighting any indicators which have not been achieved in Month 11 **(pages 10-13)**

5. Waiting Times Dashboard

Waiting Times Dashboard

CYPS Incomplete waiting times from referral to treatment

CYPS incomplete waits to treatment

- 12 weeks actual
- 12 weeks target

CYPS total patients waiting for treatment

Percentage currently waiting less than 18 weeks = **64%** (target to be 95% by 31.3.2015)

Commentary:

The CQUIN target is to be measured against the waiting list for treatment as at 31st March 2015. The position is likely to improve during March 2015 as the longest waiters continue to reduce and the proportion of patients waiting more than 18 weeks reduces as a proprtion of the overall waiters.

Referral to first contact - multidiciplinary teams (MDT)

MDT % seen within 18 weeks (target = 100%)

- Specialist Care (excl CYPS)
- Planned Care
- Urgent Care

Commentary:

The Specialist Care Group figures above exclude CYPS.
Hotspots remain Gender Dysphoria (ongoing discussions with commissioners) and Adult Autism Diagnosis (improving trend).

Referral to first contact - consultant led services (RTT)

RTT % complete - seen within 18 weeks (target 95%)

RTT % incomplete - waiting more than 18 weeks (target 92%)

Key Issues
- Overall Trust I&E forecast position is ahead of plan
- Significant pressures continue re in-patient staffing overspends. These are currently being offset by underspends in other areas.
- Risk rating is a 3 at Mth11
- Cash position is ahead of plan.

Comments:

The Alliance contract overall has one area of underperformance for January :

> CPA Service users with identified risks who have at least a 12 monthly crisis and contingency plan which has improved by 0.4% in the month.

The majority of the Cumbria contract underperformance is in relation to service users who are care co-ordinated by non-NTW services, and the high level of delayed discharge relates to a single patient.

Comments:

The two IAPT metrics for Northumberland continue to under perform at a contract level.

➢ Metric 701078 "moving to recovery" has increased significantly from 36.1% to 48.1% in the month

The underperformance on Crisis & Contingency plan relates to small numbers of patients across a number of Community teams.

Comments:

Ethnicity recording has dropped in February due to a number of patients who accessed IRS services (but did not go on to further treatment) where the ethnicity was not recorded). RS have been notified to ensure they gather this information.

Work is currently ongoing on improving the quality of IAPT data and this is expected to have an impact on the achievement rates over the coming months.

Comments:

The majority of patients have their care co-ordination function carried out by non-NTW staff which impacts on the percentage of CPA users recorded as having a review in the last 12 months.

As per previous months the delayed discharge relates to one patient where Social Services are still looking for suitable alternative accommodation.

Under recording on ethnicity is due to small numbers of clients over a number of different clinical services.
