

**NORTHUMBERLAND, TYNE AND WEAR NHS FOUNDATION TRUST**

**BOARD OF DIRECTORS' MEETING**

**Meeting Date:** 24 June 2015

**Title and Author of Paper:** CQC Compliance/Registration Update, Lisa Quinn, Executive Director of Performance and Assurance

**Paper for Debate, Decision or Information:** Information

**Key Points to Note:**

**Compliance Visits**

There have been no compliance visits to the Trust since the last update. The CQC publish on their website each month the Trusts which are to receive a visit within the next 20 weeks, NTW are aware that we will not be visited by the CQC for a routine compliance visit before November 2015.

**Registration Update**

CQC approved application to remove Cherry Knowle Hospital from the Trusts Registration.

**Notifications**

There have been no notifications submitted to the CQC since the last update.

**CQC Mental Health Provider Profile**

The Trust was asked by the CQC to complete a Mental Health Provider Profile, they requested information on all of the services provided by the Trust. For community services this was all physical sites where services were provided, this included locations where only staff were based as well as the sites where services were provided; in addition to this information we were required to provide details of the number of clinics per month which take place for each service. The CQC provided a very broad definition of what they would describe as a clinic, this was "every half day set aside by a single clinician/professional to see patients", it was noted that these figures did not need to be exact they just needed to broadly indicate the size and activity level of the service; so for the purpose of this exercise we calculated the number of clinics using the methodology of an average of 7 clinics per each clinician/professional within the teams.

For in-patient services they required information on all of the wards across the Trust and an average percentage occupancy level for the past year.

All of the information contained within the appendices was collected following discussion with all of the Service Managers within the Trust.

A copy of the information collated is attached – Appendix 1 shows information relating to community services and Appendix 2 shows information for in-patient services.

**Outcome required:**

Board to note contents of this paper.
