Local Authorities

Costs of around
£300 Million

Northumberland, Tyne and Wear NHS Foundation Trust 2018/19 in numbers:

88%

The proportion of 7,000 service users and carers who responded to the Friends and Family Test and would recommend our services

40

The average number of bed days per month that local service users were inappropriately admitted out of area per month between April 2018 to March 2019

4

The number of mental health and disability trusts rated "Outstanding" by the Care Quality Commission, out of 52 NHS trusts.

80%

The number of people with a first episode of psychosis beginning treatment with a NICE recommended care package within two weeks of referral.

67%

The response rate to the 2018 staff survey, which was 16% points above the national average and 3% points higher than the previous year

43,100

The number of service users cared for by the Trust on 31 March 2019

Part 1

Welcome and Introduction to the Quality Account

Northumberland, Tyne and Wear NHS Foundation Trust was established in 2006, is one of the largest mental health and disability organisations in the country and has an annual income of more than £300 million.

We provide a wide range of mental health, learning disability and neuro-rehabilitation services to a population of 1.4 million people in the North East of England. We employ over 6,000 staff, operate from over 60 sites and provide a range of comprehensive services including some regional and national services.

We support people in the communities of Northumberland, Newcastle, North Tyneside, Gateshead, South Tyneside and Sunderland working with a range of partners to deliver care and support to people in their own homes and from community and hospital based premises. Our main hospital sites are:

- Northgate Hospital, Morpeth (numbered 1 on the map on page 6)
- St. George's Park, Morpeth (2)
- St. Nicholas Hospital, Newcastle upon Tyne (3)
- Walkergate Park, Newcastle upon Tyne (4)
- Ferndene, Prudhoe (5)
- Monkwearmouth Hospital, Sunderland (6)
- Hopewood Park, Sunderland (7)

What is a Quality Account?

All NHS healthcare providers are required to produce an annual Quality Account, to provide information on the quality of services they deliver.

We welcome the opportunity to outline how we have performed over the course of 2018/19, taking into account the views of service users, carers, staff and the public, and comparing ourselves with other Mental Health and Disability Trusts. This Quality Account outlines the good work that has been undertaken, the progress made in improving the quality of our services and identifies areas for improvement.

To help with the reading of this document we have provided explanation boxes alongside the text.

This is an “explanation” box

It explains or describes a term or abbreviation found in the report.

Information in this Quality Account includes NTW Solutions, a wholly owned subsidiary company of NTW

This is an “experience” box

It gives the experiences of service users.

Statement of Quality from the Chief Executive

Thank you for taking the time to read our 2018/19 Quality Account, reflecting upon another busy year.

In 2018 we continued to develop innovative services, such as virtual reality technology, used with young people and those with phobias, and I was delighted when the Personality Disorder Hub team won a prestigious Health Service Journal award for patient safety.

We have championed mental health and disability awareness both within the wider NHS, via the North East and North Cumbria Integrated Care System, and also with local business leaders. Recently we were also recognised as a “Diversity Champion” by LGBT charity, Stonewall, marking our commitment to making NTW a great place to work for all members of staff.

We were proud in 2018 to once again be rated as “Outstanding” by the Care Quality Commission, highlighting positive findings such as our person centred culture, caring staff and drive to improve services. We know that we have more to do to reduce restrictive practices in inpatient settings, and to reduce the waiting times to access some services.

In early 2019, our Board of Directors agreed to work towards taking on responsibility for the provision of a range of mental health and learning disability services in North Cumbria, currently provided by Cumbria Partnership NHS Foundation Trust. We are looking forward to sharing learning from our services with colleagues in North Cumbria while also enabling them to share their good practice with us.

We have set out in this document how we have performed against local and national priorities - including how we have progressed with our Quality Priorities for 2018/19. We have also set out in this document our Quality Priorities for 2019/20, and look forward to reporting our progress against these in next year’s Quality Account.

A handwritten signature in black ink that reads "John Lawlor".

John Lawlor
Chief Executive

The Northumberland, Tyne and Wear
NHS Foundation Trust is often referred to
as “NTW” or “NTWFT”.

Statement from Executive Medical Director and Executive Director of Nursing & Chief Operating Officer

We were proud this year to develop a range of collaborative partnerships, working with other organisations to improve the quality of care for our service users, to learn from others and to share our own learning.

We have launched a collaborative partnership with one of India's largest providers of mental health services, allowing us to mutually share expertise in the delivery of care to different populations.

We have also worked closely throughout the year with colleagues in North Cumbria, developing plans to improve the outcomes and quality of care provided and to improve the sustainability and resilience of mental health services provided in the area.

This year we have focussed upon the following quality priorities:

- Improving waiting times to access services,
- Improving the inpatient experience,
- Embedding the Principles of the "Triangle of Care" (a carer initiative), and
- Embedding Trust Values.

This year we have developed an "Equality, Diversity & Inclusion Strategy" and we will focus upon developing a better understanding of any barriers to accessing our services, particularly for those service users with protected characteristics. Only by understanding and removing those barriers can we meet everyone's needs and ensure high quality care for all.

Dr Rajesh Nadkarni
Executive Medical Director

Gary O'Hare
Executive Director of Nursing & Chief Operating Officer

People receiving treatment from NTW are often referred to as "patients", "service users" or "clients". To be consistent, we will mostly use the term "service users" throughout this document.

Statement of Quality from Council of Governors Quality Group

The Council of Governors scrutinises the quality of services provided by Northumberland, Tyne and Wear NHS Foundation Trust via a Quality Group who meet every two months. The group considers all aspects of quality, with a particular emphasis on the Trust's annual quality priorities.

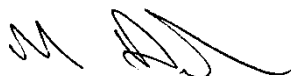

During 2018/19 the group received a number of presentations and updates from Trust representatives on varied topics including Recovery Colleges, carer initiatives, the Positive and Safe violence reduction strategy and transitions from children and young people's services to adult services.

The presentations provided Governors with a valuable opportunity to engage with staff, understand ongoing initiatives and to evaluate the quality of services provided. Members of the group have continued to attend the Trust Quality and Performance Committee and we have also played a valuable role in developing the 2019/20 Trust Quality Priorities.

In 2019/20 we will continue to monitor progress towards Quality Priorities and continue to participate in visits to Trust services.

Governors also complement engagement with service users and carers by being active members of the Service User and Carer Reference Group, the Service User & Carer Involvement & Engagement Group, the Triangle of Care Group (see page 38) and are currently involved in the development of the Service User & Carer Involvement Strategy.

All of these activities contribute to a thorough understanding by Governors of the issues impacting on the quality of services provided.

A handwritten signature in black ink, appearing to read 'M Adams'.

Margaret Adams

Chair, Northumberland, Tyne and Wear NHS Foundation Trust Council of Governors Quality Group

Care Quality Commission (CQC) Findings

In 2018, the Care Quality Commission (CQC) conducted an inspection of our services and once again rated us as “Outstanding”. We are one of only four Mental Health and Disability Trusts in the country to be rated as such, as at 1 April 2019.

All of our core services are rated overall as either “Good” or “Outstanding”, and we aim to protect, build upon and share our outstanding practice. We are also addressing all identified areas for improvement, which included:

- Reducing blanket restrictive practices,
- Availability of nurse call systems on inpatient wards, and
- Recording of physical health observations following the use of rapid tranquilisation.

Part 2a

Looking Ahead – Our Quality Priorities for Improvement in 2019/20

This section of the report outlines the annual Quality Priorities identified by the Trust to improve the quality of our services in 2019/20.

Each year we set annual Quality Priorities to help us to achieve our long term Quality Goals. The Trust identifies these priorities in partnership with service users, carers, staff and partners from their feedback, as well as considering information gained from incidents and complaints, and by learning from Care Quality Commission findings.

Quality Priorities should reflect the greatest pressures that the organisation is currently facing.

An engagement process was undertaken from December 2018 to January 2019, inviting governors, service users, carers, staff, commissioners and other stakeholders to consider two questions relating to our Equality, Diversity & Inclusion Strategy:

1. How can we **understand** the communities we serve?

2. How will we know if we're meeting their **needs**?

By engaging with the diverse communities we serve, gathering information on how our work affects different groups, we can identify and remove barriers that prevent people we serve from being treated equally.

These are the agreed Quality Priorities for the year 2019/20, and how we intend to achieve them:

Safety	Clinical Effectiveness
<p>Improving the inpatient experience</p> <p>Continue to monitor average bed occupancy on adult and older people's mental health wards against the baseline period of January to March 2018.</p> <p>Continue to monitor average patient days receiving inappropriate out of area treatment (OAT).</p> <p>Implement reporting average patient days receiving OAT within NTW</p> <p>Continue to monitor service user and carer experience</p>	<p>Evaluating the impact of staff sickness on quality</p> <p>Determine a methodology for conducting a comparative analysis of staff sickness absence rates.</p> <p>Establish a measure of "continuity of care" for community services.</p> <p>Undertake a comparative analysis of staff sickness absence rates and relevant factors for each locality care group.</p> <p>Highlight the impact of staff sickness on quality to relevant clinical areas.</p>
Service User & Carer Experience	
<p>Improving waiting times</p> <p>Continue to reporting waiting times to first contact for adult services and commence reporting waiting times to treatment for adult and older people's mental health services.</p> <p>Split children and young people's services waiting times reporting into pathways, using second contact as treatment proxy, monitor and report using new format.</p> <p>Continue to monitor and report Gender Dysphoria, adult ADHD diagnosis and adult ASD diagnosis waiting times.</p>	<p>Equality, Diversity & Inclusion</p> <p>Our implementation will involve a trustwide approach working across Locality Groups. the Equality & Diversity Lead, NTW Academy, Chaplaincy, Commissioning & Quality Assurance, Accessible Information Standard Group, and Communications</p> <p>We will work with the staff networks for BAME, Disability, LGBT+ and the Mental Health Staff Network.</p>

Part 2b

Looking Back – Review of Quality Goals and Quality Priorities in 2018/19

In this section we will review our progress against our 2018/19 **Quality Priorities** and consider the impact they may have made on each overarching **Quality Goal**.

Our 2018/19 Quality Priorities were:

Safety	Clinical Effectiveness
Improving the inpatient experience	Embedding Trust Values
Service User & Carer Experience	
Improving waiting times	Embedding the Principles of Triangle of Care

Improving the inpatient experience

<p>We said we would:</p>	<ol style="list-style-type: none"> 1. Reduce the number of service users being admitted to inpatient beds outside of the Trust because we have no beds available. 2. Reduce bed occupancy rates so that beds are always available. 3. Reduce the number of service users who are admitted to our beds outside of their home locality. 4. Monitor the feedback we receive from inpatients about their experience of being cared for on our wards. 																										
<p>Progress</p>	<p>Ongoing</p> <p>(1) The number of inappropriate out of area bed days during 2018/19 is shown in Figure 2. There has been a reducing trend throughout the year.</p> <div data-bbox="798 795 1436 1288"> <p><i>Figure 2: Number of inappropriate Out of Area bed days by month, 2018/19</i></p> <table border="1"> <caption>Inappropriate Out of Area bed days 2018/19</caption> <thead> <tr> <th>Month</th> <th>Number of days</th> </tr> </thead> <tbody> <tr><td>April</td><td>88</td></tr> <tr><td>May</td><td>35</td></tr> <tr><td>June</td><td>51</td></tr> <tr><td>Jul</td><td>75</td></tr> <tr><td>Aug</td><td>21</td></tr> <tr><td>Sep</td><td>0</td></tr> <tr><td>Oct</td><td>23</td></tr> <tr><td>Nov</td><td>63</td></tr> <tr><td>Dec</td><td>47</td></tr> <tr><td>Jan</td><td>7</td></tr> <tr><td>Feb</td><td>38</td></tr> <tr><td>Mar</td><td>28</td></tr> </tbody> </table> <p>Data source: NTW</p> </div> <p>(2) Average bed occupancy levels during 2018/19 have been monitored and are compared with a baseline position from the previous year to ensure the Trust is moving towards achieving the optimal bed occupancy rate of 85% as recommended by the Royal College of Psychiatrists.</p> <p>During the last quarter of 2017/18 (the baseline period) the average bed occupancy rate in mainstream services (including leave days) was:</p> <ul style="list-style-type: none"> • adult (acute, rehab & PICU) = 95% occupancy rate • older people = 88% occupancy rate <p>The bed occupancy level in 2018/19 for adult mainstream beds reduced between July – December 2018, reaching its lowest level in Q3 at 92.8% (2% reduction compared to baseline). An increase in occupancy rate is shown in the latest quarter of 2018/19 (January – March 2019) compared to previous months, and exceeds baseline position (3% increase). This is shown in table 2. During the year the number of available beds in adult mainstream beds have reduced, mostly during Q4, and as a consequence the bed occupancy rate has increased. Over the year there has been a reduction in occupied bed</p>	Month	Number of days	April	88	May	35	June	51	Jul	75	Aug	21	Sep	0	Oct	23	Nov	63	Dec	47	Jan	7	Feb	38	Mar	28

days (OBDs) which is evident in table 3. The graphs and tables below illustrate the bed occupancy over the year.

The bed occupancy level for **older people's** beds during 18/19 has reduced below the baseline, and has seen a further reduction in the latest quarter (January – March 2019) (16% reduction from baseline). The number of occupied bed days has also reduced in older people's inpatient services. As within adult services, there has been a reduction in available beds.

The management of bed utilisation remains a significant issue for the Trust therefore this will remain a Quality Priority for 2019/20 and 2020/21. There will be a small number of bed reductions during 2019/20 linked to the system wide review of both adult and older people's services within Newcastle and Gateshead previously known as Deciding/Delivering Together.

Table 2: Average bed occupancy by quarter, 2018/19

Average bed occupancy including leave	Adult mental health wards including PICU (Q4 1718 baseline = 95%)				Older People's mental health wards (Q4 1718 baseline = 88%)			
	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4
North	93.7%	94.3%	91.4%	92.8%	93.9%	91.0%	94.4%	93.8%
Central	99.4%	95.7%	95.9%	96.5%	67.1%	78.0%	88.9%	91.9%

Data source: NTW

(3) An approach to capture inappropriate out of area placement bed usage within the NTW footprint remains in development.

(4) Analysis of the Friends and Family Test recommend scores for adult and older peoples mainstream mental health wards April 2018 to March 2019:

Figure 5: Friends and Family Test scores for adult and older people's MH wards by quarter 2018/19

Data source: NTW

North Locality 56; Central Locality 108; South Locality 211

Figure 5 shows the Friends and Family Test (FFT) "recommend" score for each quarter of 2018-19. The results are based upon 375 surveys received, and the North locality, which received the fewest surveys, has the greatest variation in scores:

The above data is based upon the following number of surveys received:

	<p>Note that uptake of Points of You within some of the inpatient areas remains low, work is ongoing to encourage higher volumes of responses. For more information on Points of You please see pages 45 and 90.</p> <p>No comments or complaints relating to travelling to wards were received during the year 2018/19.</p>
--	--

"I wish the hospital ... was a care home, as my Dad is so happy, I've never seen him so happy. The staff are so lovely and caring, it will be so sad to see my Dad leave... I worry all the time about my Dad as I live down south, it's so hard being away from him. I call every day the staff are so lovely even put my Dad on the phone. I came back after visiting for a couple of days and I have no worries where he is as he is so settled and come a long way since I last saw him. Thank you so much..."

"...My first weekend leave went well however when I returned on the Monday (lunch time) there was no (room/bed) for me and had to wait 6hrs. My husband or myself could have been informed. The following day I was allowed home (Tuesday) on leave, waited 6 1/2 hours for discharge to be arranged..."

+ benchmarking section (AF)

How has the Improving the inpatient experience Quality Priority helped support the Safety Quality Goal of Keeping You Safe?

We aim to demonstrate success against this quality goal by reducing the severity of incidents and the number of serious incidents across the Trust's services.

Figure 6 shows the total number of patient safety incidents reported by the Trust over the past 3 years:

Compared with the previous year, there has been a 4% increase in the number of patient safety incidents. Patient safety incidents represent 28% of the total number of incidents reported for the year, which totalled 30,662 (an increase of 5% from the previous year).

Figure 6: Number of reported **patient safety** incidents and total incidents 2016/17 to 2018/19

Data source: NTW

Table 4: Number and percentage of **patient safety** incidents by impact 2016/17 to 2018/19

Number of Patient Safety incidents reported by impact:	2016/17		2017/18		2018/19	
No Harm	6,626	52%	6,584	59%	7,328	64%
Minor Harm	5,181	41%	3,692	33%	3,595	31%
Moderate Harm	770	6%	752	7%	540	5%
Major Harm	79	1%	38	0%	46	0%
Catastrophic, Death*	109	1%	46	0%	25	0%
Total patient safety incidents	12,765	100%	11,112	100%	11,534	100%

Data source: NTW

Note, annual totals for previous years may differ from previously reported data due to on-going data quality improvement work and to reflect coroner's conclusions when known. Data is as at 2 April 2019.

*The reduction in the number of reported deaths from 2017/18 follows changes to national reporting rules regarding deaths of unknown cause. We are now only required to report actual self-harm related deaths.

The “no harm” or “minor harm” patient safety incidents now account for 95% of reported patient safety incidents, with an increase in the number assessed as “no harm”.

Degree of harm in patient safety incident reports

No Harm – a situation where no harm occurred: either a prevented patient safety incident or a no harm incident

Minor Harm – any unexpected or unintended incident that required extra observation or minor treatment and caused minimal harm to one or more persons

Moderate Harm – any unexpected or unintended incident that resulted in further treatment, possible surgical intervention, cancelling of treatment, or transfer to another area, and which caused short-term harm to one or more persons

Major Harm – any unexpected or unintended incident that caused permanent or long-term harm to one or more persons

Catastrophic, Death – any unexpected or unintended event that caused the death of one or more persons.

Table 5: **Total** incidents 2018/19 for local CCGs, includes patient safety and non-patient safety incidents

Total incidents by locality	No Harm	Minor Harm	Moderate Harm	Major Harm	Catastrophic, Death
NHS Northumberland CCG	7,804	2,215	237	18	156
NHS North Tyneside CCG	2,164	650	75	10	109
NHS Newcastle Gateshead CCG	7,877	2,260	271	21	337
<i>Newcastle</i>	5,730	1,633	173	13	259
<i>Gateshead</i>	2,147	627	98	8	78
NHS South Tyneside CCG	1,812	546	71	9	122
NHS Sunderland CCG	4,793	1,756	336	29	263
Total for local CCGs	24,450	7,427	990	87	987

Data source: NTW

Note that column 5 includes all deaths including by natural causes, and that there are also incidents relating to service users from other non-local CCGs, the trust total deaths for NTW is 1,035. There is more information on Learning from Deaths on page 65.

Openness and Honesty when things go wrong: the Professional Duty of Candour

All healthcare professionals have a duty of candour which is a professional responsibility to be honest with service users and their advocates, carers and families when things go wrong. The key features of this responsibility are that healthcare professionals must:

- Tell the service user (or, where appropriate, the service user's advocate, carer or family) when something has gone wrong.
- Apologise to the service user. Offer an appropriate remedy or support to put matters right (if possible).
- Explain fully to the service user the short and long term effects of what has happened.

At NTW we try to provide the best service we can. Unfortunately, sometimes things go wrong. It is important that we know about these so we can try to put things right, and stop them from going wrong again.

If you wish to make a complaint you can do so by post to: Complaints Department, St. Nicholas Hospital, Gosforth, Newcastle upon Tyne NE3 3XT

By email: complaints@ntw.nhs.uk

By phone: 0191 245 6672

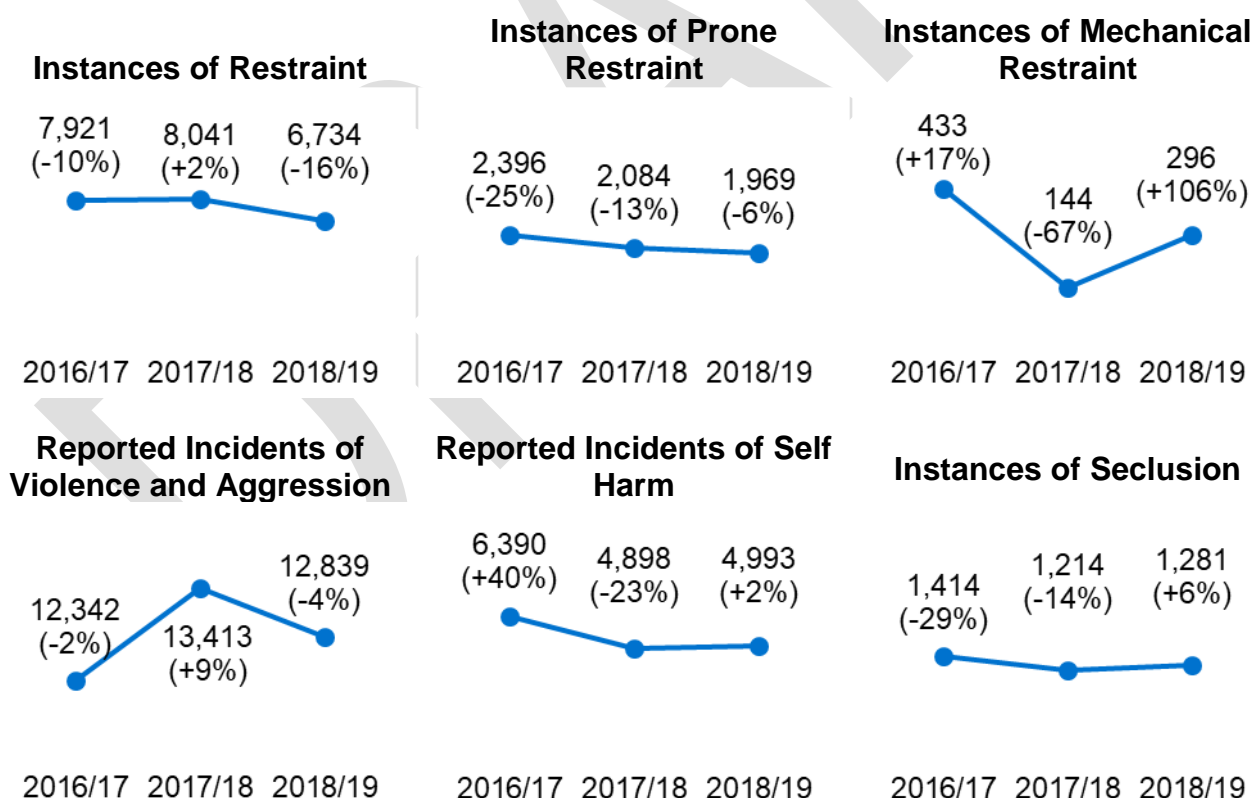

A key requirement is for individuals and organisations to learn from events and implement change to improve the safety and quality of care. We have implemented the Duty of Candour, developed a process to allow thematic analysis of reported cases, raised awareness of the duty at all levels of the organisation and we are also reviewing how we can improve the way we learn and ensure that teams and individuals have the tools and opportunities to reflect on incidents and share learning with colleagues. Healthcare professionals must also be open and honest and take part in reviews and investigations when requested. All staff are aware that they should report incidents or raise concerns promptly, that they must support and encourage each other to be open and honest, and not stop anyone from raising concerns.

We have reviewed our approach to Duty of Candour, in light of the national publications on death reviews and have been applying this new approach since April 2017.

Through the last year the Safer Care Team has continued to report through the governance system of the Trust producing monthly and quarterly Safer Care reports for the clinical care groups. Learning has developed over the last year with the creation of the Learning and Improvement Group, as well as significant development of the Safer Care Intranet site and Safer Care Bulletin. These have been well received and embedded throughout the organisation. The Safer Care Team continues through its subject experts to support key governance systems such as Infection, Prevention and Control, Safeguarding, Health, Safety, Security and Emergency Preparedness, and has improved significantly over the last year the key corporate processes of serious incidents, including learning from deaths and mortality reviews as well as complaints, claims and complex case panel reviews. All of the learning is shared through the Safer Care reports and presented to the Board of Directors as well as the Quality Review Groups where shared learning with our Commissioners takes place.

Positive and Safe Strategy impact in numbers:

Figure 7: Talk 1st number of incidents (can change on previous year) 2016/17 to 2018/19

Data source: NTW

The Positive and Safe strategy continues to deliver positive change in relation to the reduced use of restrictive interventions across NTW.

Reductions in the use of restraint, prone restraint, and violence and aggression have been noted.

Small increases have been noted in the areas of violence and aggression and restraints overall, this is largely attributable to a small number of highly complex patients across the trust and improved reporting systems. It is encouraging to note that despite the rise in the aforementioned fewer restrictive interventions overall are being used as a result.

Inpatient and community teams across the trust are engaged in the Talk 1st programme which aims to reduce violence and aggression by ensuring our environments are positive, inclusive and person centred. This approach has been embraced by the teams and has resulted in a number of positive practice examples, some of which have received national recognition as best practice.

Freedom to Speak Up

As the key to the delivery of safe and compassionate care, the Trust is committed to an open reporting culture about the quality of care, patient safety, or bullying. Staff are encouraged to embrace as normal practice the raising of concerns, speaking to their manager or in team meetings. They are further supported by the Freedom to Speak Up (FTSU) Guardian and a network of 31 FTSU Champions. Managers are required to also inform self-employed, contractors, agency staff, volunteers, or students/apprentices/trainees on placement, about the raising concerns process.

Every page of the staff Intranet gives Raising Concerns information, including details of how to raise concerns outside the Trust, giving details of (among others) the CQC and Public Concern at Work. Posters detailing how to contact the FTSU Guardian are widely distributed.

Concerns are responded to as locally as possible. Those hearing the concerns may instigate investigatory processes. Those hearing concerns are required to report back to those raising concerns about the outcome of any enquiry and any proposed remedial action. This is usually done in writing or in a feedback meeting, and may be done to individuals or staff groups.

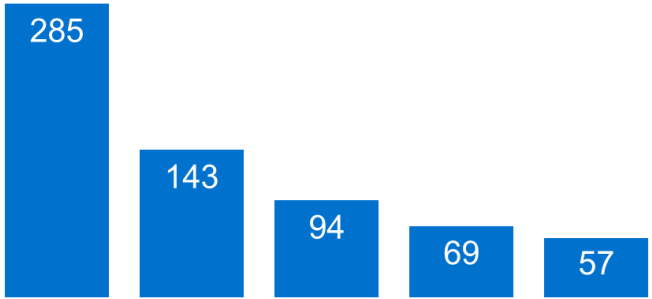

As a matter of policy, staff who speak up are protected from detriment even if it later transpires that they were mistaken in their suspicions or belief. The Trust does not tolerate bullying, harassment or victimisation of anyone raising a concern, and such behaviour would be dealt with under the Trust's Disciplinary Procedure (including the possibility of dismissal).

The **Gender Identity Service** is a regional service commissioned by NHS England, therefore the data for this service is not displayed at Clinical Commissioning Group (CCG) level.

Figure 10: Gender identity service waiting list 2018-19

Data source: NTW

The overall waiting list for this service has dramatically increased during the year, due to the sustained increase in referrals received. As at 31 March 2019, there were a total of 763 adults waiting to access the service, more than double the equivalent number as at 31 March 2018 (366). NHS England has recognised the national difficulties in meeting the demand for these services and a procurement exercise is taking place during 2019 to review the current provision.

NTW data for **Five Year Forward View for Mental Health** waiting time standards:

Table 6: Five Year Forward View for Mental Health waiting times data 2018/19

Area	Waiting time measure	Minimum standard	NTW data	Data period
Early Intervention in Psychosis (EIP)	% starting treatment within two weeks of referral	50%	79.6%	April 2018 to March 2019
Improving Access to Psychological Therapies (IAPT)	% entering treatment within 6 weeks	75%	99.8%	April 2018 to March 2019
Children and young people with an eating disorder	% urgent cases starting treatment within one week of referral	95% by 2020/21	100%	April 2018 to March 2019
	% routine cases starting treatment within four weeks of referral		86.2%	

Data source: NTW

Waiting times analysis at locality level

In **Northumberland**, waiting times for non specialised adult services have reduced, with 13 individuals waiting more than 18 weeks for their first contact as at 31 March 2019.

Within services for Children and Young People (CYPS), there has been a sustained improvement, with no child or young person waiting more than 18 weeks for treatment during the whole year. Waiting times for the adult attention deficit hyperactivity disorder diagnosis services have improved and waits for the adult autism spectrum disorder diagnosis service have slightly lengthened.

Figure 11a-f: Northumberland CCG waiting lists, assorted metrics

Data source: NTW

In **North Tyneside**, the waiting times for adult services have remained broadly under 18 weeks and waits for adult ADHD services have reduced. There has been some increase in services users experiencing long waits for the adult autism spectrum disorder diagnosis service.

Figure 12a-d: North Tyneside CCG waiting lists, assorted metrics

Data source: NTW

NTW does not provide community services for children and young people in North Tyneside, this service is provided by Northumbria Healthcare NHS Foundation Trust.

<https://www.northumbria.nhs.uk/our-services/childrens-services/child-and-adolescent-mental-health-service-camhs/>

In **Newcastle**, the waiting times for adult services are similar to last year where very few service users have a long wait to be seen.

The introduction of a single point of contact for children and young people's services in Newcastle has seen a reduction in the numbers waiting, although the *proportion* waiting more than 18 weeks has remained broadly similar throughout the last year.

There has been reductions in the waiting times for the adult attention deficit hyperactivity disorder diagnosis services and for the adult autism spectrum disorder diagnosis service.

Figure 13a-f: Newcastle locality waiting lists, assorted metrics

Data source: NTW

In **Gateshead**, there has been improvements in the waiting times for all service areas. There has been a big reduction in the number of Children & Young People waiting for treatment and at 31 March 2019 there were none waiting more than 18 weeks.

Figure 14a-f: Gateshead locality waiting lists, assorted metrics

Data source: NTW

In **South Tyneside**, there has been further improvements in the waiting times to first contact for adult services, with none waiting more than 18 weeks.

Waiting times for children and young people services have seen a reduction in both number waiting and proportion waiting over 18 weeks compared with one year ago.

There has been an improvement in waits to access the adult attention deficit hyperactivity disorder diagnosis service and an increase in the number waiting to access the adult autism spectrum disorder diagnosis service.

Figure 15a-f: South Tyneside CCG waiting lists, assorted metrics

Data source: NTW

In **Sunderland**, waiting times for adult services have improved.

Waiting times for children and young people have remained stable throughout the year, with 41% waiting more than 18 weeks as at 31 March 2019.

There has been a slight improvement in waits to access the adult autism spectrum disorder diagnosis service and a worsening of waits for the adult attention deficit hyperactivity disorder diagnosis service.

Service User & Carer Experience 2018/19 Quality Priority:

Embedding the principles of the Triangle of Care

We said we would:	<p>Continue to embed the Triangle of Care, ensuring that we work in partnership with service users and carers.</p> <p>Roll out the use of the Triangle of Care to services for Children and Young People.</p> <p>Closely monitor feedback from carers to measure the impact of this initiative.</p>
Progress	<p>Partially Met</p> <p>An initial meeting has taken place with Tyne and Wear Citizens Programme to discuss an evaluation of Impact of Triangle of Care. This would involve a working group involving Carers, Carer Centre Leads, representation from Tyne and Wear Citizens Programme and NTW.</p> <p>We are awaiting the findings from a national survey regarding Triangle of Care to influence the development of the evaluation tool and its implementation.</p> <p>Triangle of Care self-assessments and action plans are continuously monitored through the carer champion forums and individual wards and teams. Regular updates are provided and discussed throughout team meetings. Any outstanding actions from the action plans are discussed at the Trust Wide Triangle of Care Steering Group, which reports into the Trust Quality and Performance committee via the Service User and Carer Involvement and Experience group.</p> <p>We are awaiting enhancements to the electronic clinical record which will support the Getting To Know You process.</p> <p>Existing groups and structures are in place for Triangle of Care Children and Young People to report into. We are awaiting National Guidance for Triangle of Care and Young People Self-assessment.</p>

Statement on Triangle of Care

The Triangle of Care is a national scheme, to promote therapeutic alliance between the service user, their mental health professional and their carers, promoting safety, supporting recovery and sustaining wellbeing. The Trust adopted the scheme a number of years ago, and has placed significant emphasis on embedding these principles across the organisation by making Triangle of Care a Quality Priority for each of the last three years.

During the last year, I have been involved in an in-depth review of the effectiveness of Triangle of Care in practice, considering the impact of organisational changes and the development of the engagement function. I am pleased to see that the governance

processes relating to this initiative have been strengthened, ensuring that Governors and Board members will remain sighted on progress towards Triangle of Care aims, via the Quality & Performance Committee.

We will continue to engage with both carers and the workforce to ensure that the principles of Triangle of Care become second nature, and that NTW continues to participate in the national Triangle of Care initiative. While Triangle of Care is no longer a Trust Quality Priority, I am confident that NTW will continue to place significant emphasis on this important piece of work.

Margaret Adams

Chair, Northumberland, Tyne and Wear NHS Foundation Trust Council of Governors Quality Group

The six key principles of Triangle of Care are:

1. Carers and the essential role they play are identified at first contact or as soon as possible thereafter
2. Staff are 'carer aware' and trained in carer engagement strategies
3. Policy and practice protocols re: confidentiality and sharing information, are in place
4. Defined post(s) responsible for carers are in place
5. A carer introduction to the service and staff is available, with a relevant range of information across the care pathway
6. A range of carer support services are available

How have the two Service User & Carer Experience 2018/19 Quality Priorities helped support the Service User & Carer Experience Quality Goal to **work with you, your carers and your family to support your journey?**

We aim to demonstrate success against this Quality Goal by improving the overall score achieved in the annual CQC survey of adult community mental health services and by reducing the number of complaints received. We will also review the feedback received from our Points of You survey which includes the national “Friends and Family Test”.

CQC Community Mental Health Service User Survey 2018

This national survey gathered information from over 12,000 adults across England who were in receipt of community mental health services between September 2017 and November 2017. NTW’s response rate was broadly in line with the national response rate of 28%.

Overall, the Trust scored 7.0 (out of 10) in response to the question about overall experience of care. This was within the expected range for the Trust and the NTW result for this question has been relatively static for the last four years (see Figure 16).

When comparing results with other providers, CQC identifies whether a Trust performed “better”, “worse” or “about the same” as the majority of trusts for each question. The results

were an improvement against the previous year and there were three areas in 2018 where NTW performed better than other trusts to an extent that is not considered to be through chance. These related to the following questions:

- Do you know how to contact this person if you have a concern about their care? (answered by all who were told who was in charge of their care and services)
- Did you feel that decisions were made together by you and the person you saw during this discussion? (answered by all who had a formal meeting to discuss their care with someone from NHS mental health services in the last 12 months)
- Were you involved as much as you wanted to be in deciding what NHS therapies to use? (answered by those who have been receiving NHS therapies in the previous 12 months)

Figure 17: NTW's overall experience of care score 2014 to 2018

Data source: [CQC](#)

There were no areas where NTW performed worse than expected. Quantitative comments made by survey respondents can be grouped into the following themes:

- Waiting times
- Medication issues
- Continuity of care
- Accessing services in a crisis

The NTW scores by survey section are shown below, highlighting that NTW scores in the upper range of scores for all sections: None of the year on year score changes are considered statistically significant.

Table 7: National Mental Health Community Patient Survey results for 2016 to 2018

Survey section	2016 NTW score (out of 10)	2017 NTW score (out of 10)	2018 NTW score (out of 10)	2018 lowest – highest question score	2018 Position relative to other mental health trusts

Data source: [CQC](#)

Complaints

Information gathered through our complaints process is used to inform service improvements and ensure we provide the best possible care to our service users, their families and carers.

Complaints have decreased during 2018/19 with a total of 483 received during the year. This is an overall decrease of 61 (11%) from 2017/18.

In the North locality complaints decreased by 21% to 135, in the Central locality by 14% to 155

complaints in 2018/19. There were 182 complaints in the South locality which was very similar to the previous year. Complaint categories where a significant reduction is noted in comparison to 2017/18 are:

- Complaints related to prescribing categories have reduced by 52%.
- Complaints related to appointment categories have reduced by 44%
- Complaints related to values and behaviours categories have decreased by 19%
- Complaints related to waiting times categories have decreased by 59%.

Complaint categories where an increase is noted in comparison to 2017/18 is communication; complaints categorised as communication have increased by 28%. At the time of writing, 41% of complaints categorised as communication were upheld or partially upheld.

The Patient Advice and Liaison Service (PALS) gives service users and carers an alternative to making a formal complaint. The service provides advice and support to service users, their families, carers and staff, providing information, signposting to appropriate agencies, listening to concerns and following up concerns with the aim of helping to sort out problems quickly.

Figure 18: Number of complaints received 2016/17 to 2018/19

Outcomes of complaints

Within the Trust there is continuing reflection on the complaints we receive, not just on the subject of the complaint but also on the complaint outcome. In 2018/19 we responded to complaints in line with agreed timescales in 90% of cases. [Table 9](#) indicates the numbers of complaints and the associated outcomes for the past three years:

Table 9: Number (and percentage) of complaint outcomes 2016/17 to 2018/19

Complaint Outcome	2016/17	2017/18	2018/19
Closed – Not Upheld	135 (31%)	150 (27%)	132 (27%)

Complaints referred to the Parliamentary and Health Service Ombudsman

If a complainant is dissatisfied with the outcome of a complaint investigation they are given the option to contact the Trust again to explore issues further. However, if they choose not to do so or remain unhappy with responses provided, they are able to refer their complaint to the Parliamentary and Health Service Ombudsman (PHSO).

The role of the PHSO is to investigate complaints that individuals have been treated unfairly or have received poor service from government departments and other public organisations and the NHS in England.

Outcome of complaints considered by PHSO, as at 31 March 2019 there were 23 cases still ongoing and their current status at the time of writing is as follows:

Table 10: Outcome of complaints considered by the PHSO

Enquiry	18
Draft – partially upheld	1
Draft – not upheld	1
Intention to investigate	3

Data source: NTW/PHSO

Friends and Family Test – Service Users and Carers

The NHS Friends and Family Test is a national service user and carer experience feedback programme. The Friends and Family Test question asks:

How likely are you to recommend our service to friends and family if they needed similar care or treatment?

There are 5 possible answer options ranging from extremely likely to extremely unlikely (with an additional option of 'don't know').

Figure 19: Percentage of respondents who would or would not recommend the services they received to their friends and family 2016/17 to 2018/19

Data source: NTW

During 2018/19, 6,973 responses to the Friends and Family Test question were received which was a 6% increase in responses compared to 2017/18. Of respondents, 88% said they would recommend the service they received (rating of extremely likely or likely), this score has increased slightly compared to 2017/18. Six percent of respondents indicated they would not recommend the service they received (ratings of extremely unlikely or unlikely) which is also a small decrease compared to 2017/18.

Points of You Survey

We use the Points of You survey to gather feedback from service users and carers about their experience of our services. For more information on Points of You please see page 90.

The below Table 11 shows the questions asked in the survey and the results for the past 2 years, in 2018/19 we received feedback from approximately 5,000 service users and 1,600 carers (with an additional 400 responses here this information was not provided):

Table 11: Points of You question scores (out of 10), 2017/18 to 2018/19

Question	2017/18	2018/19
How kind and caring were staff to you?	9.3	9.4
Were you encouraged to have your say in the treatment or service received and what was going to happen?	8.5	8.6
Did we listen to you?	8.8	8.9
If you had any questions about the service being provided did you know who to talk to?	8.5	8.5
Were you given the information you needed?	9.0	9.1
Were you happy with how much time we spent with you?	8.2	8.3
Did staff help you to feel safe when we were working with you?	9.1	9.2
Overall did we help?	8.6	8.7

Data source: NTW

This data for 2018/19 can be displayed by service type, as per Table 12 below:

Embedding Trust values

We said we would:	<p>Identify and reduce instances where we are not displaying the Trust values of being caring and compassionate, respectful, honest and transparent.</p> <p>Align themes and monitor complaints and feedback from staff, service users and carers to measure the progress of this Quality Priority.</p>
--------------------------	---

Progress

Partially Met

We have monitored feedback received in the year through a range of sources, to identify instances where services have not always demonstrated the Trust values of Caring, Respectful, Honest, and Transparent.

These sources are:

- complaints,
- comments received via the Patient Advice and Liaison Services
- general feedback and comments received through the Points of You service user and carer survey. For more information on Points of You please see pages 45 and 90.
- feedback and comments received via social media
- We have also aligned the categories used to theme comments received via the different sources, to assist comparison and analysis of data.
-

Specific analysis of responses to the Points of You question: “How kind and caring were staff to you?” shows a relatively stable position throughout the year trustwide, with the South locality consistently reporting the highest score to this question (score is out of ten):

Figure 20: Scored responses to Kind and caring experiences, by month 2018/19

Month	Score
Apr-18	9.09
May-18	9.30
Jun-18	8.97
Jul-18	9.16
Aug-18	9.18
Sep-18	9.04
Oct-18	9.23
Nov-18	9.06
Dec-18	9.02

Feb-19	9.40	8.70	9.40
Mar-19	9.30	9.20	9.50

Other activities supporting this quality priority during the year include:

- A “Compassionate Leadership” training session was delivered to the Trust wide Nursing Leadership Forum focusing on value based appreciation of leading and managing teams in understanding the emotional needs of patients and families
- A Compassionate Leadership training workshop for Complaints and Serious incident investigators took place in November
- The 2019 Nursing Conference – Delivering Compassion in Practice: Shaping the Future was held in March. Reflecting on the achievements of the previous 5 year Nursing Strategy and going forward highlighting the unique position nurses hold in shaping patient experience and person centred care
- The Nursing Leadership forum have focused on specific initiatives to improve staff Health & Wellbeing, for example a Pop up staff wellbeing café held at Monkwearmouth Hospital in January 2019
- The development of locality based action plans has not progressed as planned. This requirement will be reviewed during 2019-20.

Note that this activity will not continue to be classified as a quality priority in 2019-20. Ongoing work to support the Trust values will be monitored via the Trust Corporate Decisions Team - Quality group. Planned future activity includes:

- The development of a “Living the Values” staff recognition scheme
- Reflecting the focus on values through the development of the overarching Multi-professional Clinical Strategy
- The development (via the NTW Academy) and implementation of customer care training
- Continued promotion of the Trust values through initiatives such as Trust lanyards etc.

How has the Embedding Trust values Quality Priority helped support the Clinical Effectiveness Quality Goal of ensuring the right services are in the right place at the right time to meet all your health and wellbeing needs?

Underpinned by the organisation's approach to delivering the Clinical Effectiveness Strategy, we will demonstrate success by delivering improvements in service delivery.

Service Improvement and Developments throughout 2018/19

These are some of the key service improvements and developments that the Trust implemented during 2018/19

Northumberland

Specialised Children's Services

Over the last year, Ferndene has developed to provide services in a much more flexible way to meet the needs of young people. Wards have undertaken training and worked in partnership with community teams and other agencies to broaden the spectrum of young people they can provide care to.

Spanning no less than eight project areas across specialised children's services, teams and individuals are working together with service users and families to lead specialised children's services into a new era. Working in synergy, these projects have combined to deliver significant benefit.

Current data shows that these new ways of working have saved 2,000 out of area bed days compared with the baseline position. This is hugely beneficial to local young people and the financial savings associated with reduced out of area placements will remain within the local health economy, reinvested into healthcare services to further improve care provision.

North Tyneside

Mental Health Practitioners in Primary Care

The North Locality Care Group with key partners (CCG's and Primary Care) have recruited into additional senior nurse posts. These new innovative roles will undertake key tasks including, assessment and triage, evidence based psychological therapies, service development, and supervision to support the broader Primary Care Team for some GP

practices. This model of enhanced Primary Care is gaining prominence as a concept and is likely to be replicated across Localities

Newcastle and Gateshead

Agencies across Newcastle and Gateshead are working together to redesign mental health services, ensuring that people can easily access the right care and treatment for their needs within their community.

Enhanced Bed Management

We have supported the development of an Enhanced Bed Management (EBM) service to improve how it feels for people using our inpatient services across admission, treatment and discharge the process. This service:

- Uses the skills medical staff and Multi-Disciplinary Teams (MDTs) to support people moving through their care pathway including the discharge process.
- Uses the national role of Trusted Assessment in Mental Health services, NTW is the first mental health Trust to have implemented the national role of Trusted Assessment (TA) into mental health services.
- Has up to date information about potential delays, what might delay somebody's discharge and where beds are available. All this helps people to be moved through their care pathway more quickly and efficiently.
- Helps ensure that lengths of stay for our patients are appropriate.
- Helps to reduce the reliance on out of area beds.

This development has resulted in an enhanced bed management service which has created flow, efficiencies and productivity within the system. Implementation of new Information Technology systems, processes and the work of the staff, have all helped in the success of this innovative project.

Trusted assessors were discussed in all of the Newcastle Gateshead Delivering Together workshops in 2017. The role of the Trusted Assessor is to work with Multi-Disciplinary Teams to deliver an appropriate, timely and safe discharge. This new role is being evaluated over an 8 month period.

South Tyneside and Sunderland

Positive and safe in community services

A Positive and safe launch event was held in November 2018 for the community services within our locality. This was a fantastic opportunity to find out about the success of the strategy within inpatient services and consider how we can transfer the learning and good practice to the community. For the attendees this made complete sense and staff were really keen to make a start on implementing our own interventions following the event; acknowledging that the patients move from inpatients to the community and vice versa, therefore would recognise and understand the interventions.

We have commenced a Positive and safe forum and each of our community teams have nominated positive and safe representatives. The enthusiasm from the teams has been fantastic within 72 hours the staff were making changes and implementing interventions to improve the patient and carer experience. Examples were bringing in book cases and books for waiting areas as well as toys for children.

Lesson learned Reflective Forum for Community services

A reflective practice forum has been established within the community CBU to support the lessons learned framework. The forum, reviews all serious incidents, after action reviews and mortality reviews using a reflective model to consider any learning from the event and consider actions to reduce future reoccurrence. The forum also includes the sharing of good practice and positive news stories. To date the forum has engaged over 30 clinicians with representation from all community clinical services.

Non-medical prescribing (NMP) strategy

Developments are occurring within the South Tyneside community team with a view to evaluation and further roll out across other services. The work of the NMP lead also includes chairing a local NMP Development forum, supporting the supervision of NMPs and recruitment of Clinicians who wish to undertake training within this area (in line with the workforce plan).

NICE Guidance Assessments Completed 2018/19

The National Institute for Health and Care Excellence (NICE) provides national guidance and advice to improve health and social care. During 2018/19 the Trust undertook the following assessments against appropriate guidance to further improve quality of service provided. Assessments were conducted against all published NICE guidance deemed relevant to the Trust

Table 13: NICE Guidance Assessments Completed in 2018/19

Ref	Topic Details / Objective	Compliance Status/ main actions
QS 53	Anxiety	Partially Compliant: The development of an anxiety e-Pathway is an a important enabler in ensuring anxiety Interventions are evidence based
QS 139	Oral health promotion in the community	Partially Compliant: Develop a Service Level Agreement with the dental service in Newcastle upon Tyne Hospitals
NG6	Excess winter deaths and illness and the health risks associated with cold homes	Non-Compliant: Identify services within Northumberland that are appropriate for signposting patients
QS117	Preventing excess winter deaths and illness associated with cold homes	Non-Compliant: Align protocol to Safeguarding procedures
NG76	Child abuse and neglect	Fully Compliant: Recommendations specific to Child trafficking (1.3.45 – 1.3.47) requires adding to Safeguarding Children Policy (NTW(c) 04))
QS 88	Personality Disorders: Borderline and antisocial	Fully Compliant: Increase joint working and scaffolding between CYPS and adult services with clients undergoing transition (use of 'Moving on Plan' and the transition protocol).
QS147	Healthy workplaces: improving employee mental and physical health and wellbeing	Partially Compliant: CBUs ensure that there is a strategic approach to staff wellbeing and included in service development plans. All operational levels of decision-making take account of the impact on staff wellbeing and team resilience
QS 144	Care of Dying Adults in the last days of Life	Fully Compliant: Ensure medicines are available for safe administration when required and staff have an awareness of anticipatory medicines.
NG 108	Decision Making and Mental Capacity	Fully Compliant: Improvements to the formation of Patient Care plans- by supporting decision makers in relation to capacity assessments and best interest decisions

Ref	Topic Details / Objective	Compliance Status/ main actions
NG 93	Learning disabilities and behaviour that challenges: service design and delivery	Partially Compliant: It has been agreed by the Autism and Learning Disability Clinical Strategic Network to develop a PBS Steering group. The purpose of this group will be to oversee the maintenance of quality in the delivery of PBS. This will include the development and delivery of in-house training to new staff and to offer on-going training as part of an agreed Training-Star.
NG 56	Multimorbidity: clinical assessment and management	Partially Compliant: Need to optimize care for long term conditions -More integrated services
NG 54	Learning disabilities: identifying and managing mental health problems	Partially Compliant: We have expertise in therapeutic areas but not consistently across the Trust. The use of an agreed training strategy will enable the delivery of skills within house at a manageable pace within existing resources.
QS 142	Mental health problems in people with learning disabilities: prevention, assessment and management	

Data source: NTW

Part 2c

Mandatory Statements relating to the Quality of NHS Services Provided

Review of Services

During 2018/19 the Northumberland, Tyne and Wear NHS Foundation Trust provided and/or sub-contracted 174 NHS Services.

The Northumberland, Tyne and Wear NHS Foundation Trust have reviewed all the data available to them on the quality of care in all 174 of these relevant health services.

The income generated by the relevant health services reviewed in 2018/19 represents 100 per cent of the total income generated from the provision of relevant health services by the Northumberland, Tyne and Wear NHS Foundation Trust for 2018/19.

Participation in clinical audits

During 2018/19, 16 national clinical audits covered relevant health services that Northumberland, Tyne and Wear NHS Foundation Trust provides.

The national clinical audits eligible for participation by Northumberland, Tyne and Wear NHS Trust during 2018/19 are shown in [Table 14](#).

Table 14: National Clinical Audits 2018/19

1	POMH-UK Topics 1g & 3d: Prescribing High Dose & Combined Anti-Psychotics
2	POMH-UK Topic 17a: Use of Depot / LA Anti-psychotic injections for relapse prevention
3	POMH-UK Topic 15b: Prescribing Valproate for Bipolar Disorder
4	POMH-UK Topic 16b: Rapid Tranquilisation
5	POMH-UK Topic 18a: Prescribing Clozapine
6	POMH-UK Topic 6d: Assessment of the Side Effects of Depot Anti-Psychotics (BAF)
7	POMH-UK Topic 7f: Monitoring of Patients Prescribed Lithium
8	Specialist Rehabilitation for Patients with Complex Needs following Major Injury
9	National Clinical Audit of Psychosis (NCAP)
10	CCQI Early Intervention in Psychosis Network: Self-Assessment Audit 2017-2018
11	National Clinical Audit of Anxiety & Depression (NCAAD)
12	National Audit of Care at the End of Life
13	NCAP Spotlight Audit: Early Interventions in Psychosis (EIP)
14	Audit of Comprehensive Health Assessment Tool (CHAT)
15	NCAAD Spotlight Audit: Psychological Therapies
16	National Audit for Falls (Falls & Fragility Fractures Audit Programme)

Data source: NTW

The Trust participated in 100% of national clinical audits which Northumberland, Tyne and Wear NHS Foundation Trust were eligible to participate in during the 2018/19 period.

The national clinical audits that Northumberland, Tyne and Wear NHS Foundation Trust participated in, and **for which data collection was completed during 2018/19**, are listed below alongside the number of cases submitted to each audit, and as a percentage of the number of registered cases required by the terms of that audit if applicable.

Table 15: Cases submitted for National Clinical Audits 2018/19

National Clinical Audits 2018/19		Cases submitted	Cases required	%
1	National Clinical Audit of Anxiety & Depression (CA-17-0029)	Sample Provided: 105 Core Audit: 100 Random Quality Check: 5	105	100%
2	National Audit of Care at the End of Life (CA-18-0001)	Contextual Data only	n/a	n/a
3	NCAP Spotlight Audit: Early Interventions in Psychosis (CA-18-0014)	Sample Provided: 233 Contextual Questionnaires:6	233	100%
4	Audit of Comprehensive Health Assessment Tool (CA-18-0015)	Sample Provided: 30	30	100%
5	NCAAD Spotlight Audit: Psychological Therapies (CA-18-0018)	Sample Provided: 122 Core Audit: 83 Random Quality Check: 39	122	100%
6	POMH-UK Topic 16b: Rapid Tranquilisation (CA-17-0033)	Sample Provided: 46	46	100%
7	POMH-UK Topic 18a: Prescribing Clozapine (CA-18-0013)	Sample Provided: 194	194	100%
8	POMH-UK Topic 7f: Monitoring of Patients Prescribed Lithium (CA-18-0028)	Sample Provided: 110	110	100%
9	POMH-UK Topic 6d: Assessment of the Side Effects of Depot Anti-Psychotics (BAF)	Sample Provided: 223	223	100%

Data source: NTW

The reports of 4 national clinical audits were reviewed by the provider in 2018/19, and Northumberland, Tyne and Wear NHS Foundation Trust intends to take the following actions to improve the quality of healthcare provided:

Table 16: Actions to be taken in response to National Clinical Audits

Project		Actions
1	Topic 1g & 3d: Prescribing High Dose and Combined Anti-Psychotics (CA-16-0089)	<ol style="list-style-type: none"> 1. To enhance awareness of HDAT guidelines for trainees working in rehabilitation wards. 2. To educate staff members in HDAT monitoring in rehab/complex needs teams. 3. To include CGI as part of standard documents i.e. care-coordination document in RiO, so can be completed at CPA meeting every 3 months. 4. To establish a prescribing meeting on each rehab/complex needs ward and incorporate review of HDAT monitoring in the prescribing meetings. 5. To share findings with Rehabilitation / Complex Needs Clinical Network
2	Topic 17a: Use of Depot / LA Anti-psychotic injections for relapse prevention. (CA-17-0008)	<ol style="list-style-type: none"> 1. To share with staff across Trust via Safer care outlining audit results and reminding staff of needs based approach of care plans and depot card standards. 2. To update Trust Policies with specific reference to prescribers needing to re-write depot charts within six months and to include reference to CTO 11/12 forms and the need for these to be located with the depot chart.
3	POMH-UK Topic 15b: Prescribing Valproate for Bipolar Disorder (CA-17-0011)	<ol style="list-style-type: none"> 1. To Update Safe Prescribing of Valproate policy incorporating Pregnancy Prevention Programme and disseminate to Trust-wide 2. Present CRIS valproate search results to localities and encourage annual audit against standards contained in PPT-PGN-25 3. To Update valproate risk register entry
4	NCAP Spotlight Audit: Early Interventions in Psychosis (CA-18-0014)	<ol style="list-style-type: none"> 1. To prepare Wave 2 transformation funding of IPS workers. 2. To provide Feedback to the teams to encourage routine collection of outcome data and share results with staff 3. To improve use of QPR on RiO and include scoring in supervision and CPA review 4. To nominate a lead for physical health assessments and interventions within each team. 5. To develop a local team action plan around reducing weight gain and smoking 6. To encourage the use of Triangle of Care and REACT to ensure carer support is provided.

Data source: NTW

Additionally, 16 Priority clinical audits were reviewed by the provider in 2018/19 and the details can be found in Appendix 2.

Participation in clinical research

The number of patients receiving relevant health services provided or sub-contracted by Northumberland, Tyne and Wear NHS Foundation Trust in 2018/19 that were recruited during that period to participate in research approved by a research ethics committee was 2992.

This is an 80% increase on last year's recruitment figure.

The Trust was involved in 80 clinical research studies in mental health, dementia, learning disability and neuro-rehabilitation related topics during 2018/19, of which 52 were National Institute for Health Research (NIHR) portfolio studies.

This is a 6% increase from last year's figure.

During 2018/2019, 164 clinical staff employed by the trust participated in ethics committee approved research.

We have continued to work closely with the NIHR Clinical Research Network to support large scale national portfolio research projects and have achieved further successes with respect to large scale research funding in collaboration with Newcastle University.

According to the latest NIHR Clinical Research Network annual league tables NTW are the 4th most research active mental health and disability trust in England based on the number of active research studies.

Goals agreed with commissioners

Use of the Commissioning for Quality & Innovation (CQUIN) framework

The CQUIN framework aims to embed quality improvement and innovation at the heart of service provision and commissioner-provider discussions. It also ensures that local quality improvement priorities are discussed and agreed at board level in all organisations. It enables commissioners to reward excellence by linking a proportion of English healthcare providers' income to the achievement of local quality improvement goals.

A proportion of Northumberland, Tyne and Wear NHS Foundation Trust income in 2017/18 was conditional on achieving quality improvement and innovation goals agreed between Northumberland, Tyne and Wear NHS Foundation Trust and any person or body they entered into a contract, agreement or arrangement with for the provision of relevant health services, through the Commissioning for Quality and Innovation payment framework. Further details of the agreed goals for 2017/18 and for the following 12 month period are available electronically at www.ntw.nhs.uk.

For 2017/18, 6.4m of Northumberland, Tyne and Wear NHS Foundation Trust's contracted income was conditional on the achievement of these CQUIN indicators (£6.4m in 2016/17).

CQUIN Indicators

All CQUIN requirements for 2018/19 are fully delivered for quarters 1 to 3 and pending agreement for quarter 4. A summary of CQUIN indicators for 2017/18 and 2018/19 is shown in Table 17 to Table 19 below, with a summary of the actions completed for each indicator.

Note that the CQUIN indicators are either mandated or developed in collaboration with NHS England and local Clinical Commissioning Groups (CCGs), the current CQUIN programme spans two years 2017/18 and 2018/19. The range of CQUIN indicators can vary by commissioner, reflecting the differing needs and priorities of different populations.

Table 17: CQUIN Indicators to improve Safety

CQUIN Indicators to improve Safety
Reducing Restrictive Practices within adult low and medium secure inpatient services
Improving Staff Health & Wellbeing
<p>The Trust was required to achieve a 5% point improvement in two of the three NHS annual staff survey questions on health and wellbeing, musculoskeletal problems (MSK) and stress. Although we did not achieve the required improvement on our previous result we were significantly above the national average.</p> <p>The Trust achieved all of the requirements of the health food survey and have already met some of the 18/19 requirements. This includes;</p> <ul style="list-style-type: none"> a) Signing up to the national SSB reduction scheme b) Total litres of SSB sold account for 10% or less of all litres of drinks sold in 2018/19 c) 80% of confectionary and sweets do not exceed 250Kcal d) At least 75% of pre-packed sandwiches and other savoury pre-packed meals (wraps, salads, pasta salads) available contain 400kcal (1680 kJ) or less per serving and do not exceed 5.0g saturated fat per 100g. <p>76.15% of frontline workers received the 'flu vaccine (75% target).</p>
Improving physical healthcare to reduce premature mortality in people with Severe Mental Illness
<p>Whilst the Trust has made significant strides in relation to sharing information with GP colleagues as NTW staff can view primary care records via the Medical Operability Gateway performance in relation to the use of an electronic format for discharge and CPA summaries has fallen short of the CQUIN requirements. NTW has however continued to send paper formats ensuring GPs colleagues have continued to receive timely information following discharge.</p> <p>The Trust was successful in ensuring all targets were met in relation to the screening and intervention of service users with SMI or EIP as indicated within the LESTER tool</p>
Preventing ill health by risky behaviours – alcohol and tobacco
<p>The Trust was successful in ensuring that over 90% of inpatient service users were screened for alcohol and tobacco use and if required provided with a brief advice intervention. Nicotine replacement therapy was also made available during their inpatient stay.</p>

Table 18: CQUIN Indicators to improve Patient Experience

CQUIN Indicators to improve Service User & Carer Experience
Health & Justice – Patient Experience
The Points of You feedback survey has been rolled out in Liaison and Diversion services with work ongoing to improve the response rates, for more information on Points of You please see pages 45 and 90. Regular meetings and drop in sessions have been set up throughout the year. Courses running through period Patient perspective, This is me, caring for yourself and others, DBT and WRAP, Tai Chi, Creative Wellness, mood and food, Getting back to Nature, Recovery Garden, Challenge Cup, Yoga, astronomy, Music through recovery, Road to recovery, DIY. Locker Project, Photography.

Table 19: CQUIN Indicators to improve Clinical Effectiveness

CQUIN Indicators to improve Clinical Effectiveness
Development of Recovery Colleges for adult medium and low secure inpatients
A variety of courses are provided for service users with regular review of how they have engaged and enjoyed the courses.
Transitions out of Children and Young People's Community Mental Health Services
An audit of those transitioning from the mental health care pathway was completed, and has identified that young people and their families were involved in and agreed their transition plan. However, further work needs to be done to ensure that transition planning begins as early as possible with the relevant people (recommended 6-12 months prior to transition). Our services will continue to embed the 'My moving on plan' booklet to promote a smooth transition for young people from Child and Young People's Community Mental Health Services.
Children and Young People's Inpatient Transitions
All 5 areas have been achieved: <ol style="list-style-type: none"> 1. Planning for discharge/transition at the point of admission 2. Involve the young person in all discussions and decisions (as much as possible/ appropriate) 3. Involve the family/carers in all discussions and decisions (as much as possible/appropriate) - Ongoing work to involve families in shaping patients care will be undertaken via the Service User and Carer Review Meeting. 4. Liaise early with other agencies 5. Numbers of delayed discharges - There has been a reduction in delayed discharges as a result of dedicated staff having been employed to support the passage of young people through the pathway at Ferndene.
Specialised Services Discharge & Resettlement
Systems are now in place to record and report estimated discharge dates in Forensic services. The service continually monitors discharge dates and and delayed discharges are regularly monitored.
A small fund has been set up to support discharges that may otherwise be delayed due to issues relating to small items of expenditure (for example, a service user requiring a fridge).

CQUIN Indicators to improve Clinical Effectiveness

Improving services for people with mental health needs who present to A&E

Building on the work undertaken in 2017/18 NTW has worked in partnership with acute trust colleagues to identify service users who would benefit from a multi-agency care plan with the aim of reducing the number of A&E attendances. The 20% reduction was achieved in the South however the target was narrowly missed for the North and Central CCGs. This was in relation to service users with comorbid physical and mental health problems who as a result of physical issues have continued to attend A&E.

Data source (Table 17 to Table 19): [NHS England](#) and NTW

Statements from the Care Quality Commission (CQC)

Northumberland, Tyne and Wear NHS Foundation Trust is required to register with the Care Quality Commission and its current registration status is registered without conditions and therefore licensed to provide services. The Care Quality Commission has not taken enforcement action against Northumberland, Tyne and Wear NHS Foundation Trust during 2018/19.

In April 2018 the Care Quality Commission conducted a routine inspection of four core services (Acute wards for adults of working age and psychiatric intensive care units, Wards for older people with mental health problems, Child and adolescent mental health wards and Specialist community mental health services for children and young people) and rated the Trust as "Outstanding".

Northumberland, Tyne and Wear NHS Foundation Trust intends to take the following actions to address the conclusions or requirements reported by the CQC:

- We will ensure that staff monitor the physical health of patients following the administration of rapid tranquilisation.
- We will ensure that blanket restrictions are reviewed and ensure that all restrictions are individually risk assessed.
- We will ensure patients have access to a nurse call system in the event of an emergency.

In April 2018 the Trust participated in a Thematic Review of Never Events. The findings from the national review are awaited.

In February 2019 the Trust participated in a Thematic Review of Restraint, Seclusion and Long Term Segregation Thematic Review. The findings from the national review are awaited.

External Accreditations

The Trust has gained national accreditation for the quality of services provided in many wards and teams.

43% of adult and older people's mental health wards have achieved the Accreditation for Inpatient Mental Health Services.

100% of the adult forensic medium and low secure wards have been accredited by the Quality Network for Forensic Mental Health Services.

100% of children and young people's wards have been accredited by the Quality Network for Inpatient Children and Adolescent Mental Health Services.

Data source: NTW

Data Quality

Good quality information underpins the effective delivery of care and is essential if improvements in quality of care are to be made. The Trust has already made extensive improvements in data quality. During 2019/20 the Trust will build upon the actions taken to ensure that we continually improve the quality of information we provide.

Table 21: Actions to be taken to improve data quality

Clinical Record Keeping	We will continue to monitor the use of the RIO clinical record system, learning from feedback and incidents, measuring adherence to the Clinical Records Keeping Guidance and highlighting the impact of good practice on data quality and on quality assurance recording. We will continue to improve and develop the RIO clinical record system in line with service requirements.
NTW Dashboard development	We will continue to review the content and format of the existing NTW dashboards, to reflect current priorities including the development and monitoring of new and shadow metrics that are introduced in line with national requirements. We will continue to develop and embed the Points of You dashboards. For more information on Points of You please see pages 45 and 90.
Data Quality Kite Marks	We will continue to roll out and review the use of data quality kitemarks in quality assurance reports further.
Data Quality Group	We will implement a Trust wide data quality group.
Mental Health Services Dataset (MHSDS)	We will continue to understand and improve data quality issues and maintain the use of national benchmarking data. We will seek to gain

	greater understanding of the key quality metric data shared between MHSDS, NHS Improvement and the Care Quality Commission. We will continue to improve our data maturity index score and understand areas where improvement is required.
Consent recording	We will continue to redesign the consent recording process in line with national guidance and support the improvement of the recorded consent status rates.
ICD10 Diagnosis Recording	We will continue to increase the level of ICD10 diagnosis recording within community services.
Mental Health Clustering	We will increase the numbers of clinicians trained in the use of the Mental Health Clustering Tool and improve data quality and data completeness, focusing on issues such as cluster waiting times analysis, casemix analysis, national benchmarking and four factor analysis to support the consistent implementation of outcomes approaches in mental health.
Contract and national information requirements	We will continue to develop quality assurance reporting to commissioners and national bodies in line with their requirements. We will monitor and improve our data quality in line with our CQUIN requirements, Specialised Mental Health (SMH) and the Aggregate Contract Monitoring (ACM) dataset.
Quality Priorities	We will continue to develop a robust reporting structure to support the quality priorities relating to waiting times and improving inpatient care.
Outcome Measures	We will enhance the current analysis of outcome measures focusing on reporting information back to clinical teams.

North East Quality Observatory (NEQOS) Retrospective Benchmarking of **2017/18** Quality Account Indicators

The North East Quality Observatory System (NEQOS) provides expert clinical quality measurement services to many NHS organisations in the North East.

NTW once again commissioned NEQOS to undertake a benchmarking exercise, comparing the Trust's Quality Account 2017/18 with those of all other NHS Mental Health and Disability organisations. A summary of frequent indicators found in all Quality Accounts has been provided in Table 19 below:

Table 22: Nationally available Quality Account indicators for 2017/18

Quality Account Indicators		Target	England Average	Peer*	NTW
1	Staff who would recommend the trust to their family/friends (%)	-	3.66	3.65	3.81
2	Admissions to adult urgent care wards gatekept by Crisis Resolution Home Treatment Teams (%) Q4 17/18	95%	98.7	98.8	99.7
3	Inpatients receiving follow up contact within 7 days of discharge (%) Q4 17/18	95%	95.5	95.7	97.7

Quality Account Indicators		Target	England Average	Peer*	NTW
4	Incidents of severe harm/death (%) 2017/18	-	1.1	1.7	0.7
5	CPA formal review within 12 months (per March 2018)	95%	77.8	85.8	83.2
6	EIP patients treated within 2 weeks March 2018	50%	75.9	80.5	95.2
7	FFT patients recommending service (%), Jan to March 2018		88.7	87.7	89.1
8	Written complaints per 1,000 FTEs, 2017/18		83.3	111.1	55.2

Data source: North East Quality Observatory

The above table shows that the Trust consistently performs above average.

*Table 19 includes data for a peer group of similar trusts: Birmingham and Solihull Mental Health NHS Foundation Trust; Cheshire and Wirral Partnership NHS Foundation Trust; Lancashire Care NHS Foundation Trust; North East Essex Mental Health NHS Trust; Oxford Health NHS Foundation Trust; South London and Maudsley NHS Foundation Trust; Sussex Partnership NHS Foundation Trust; and Tees, Esk and Wear Valleys NHS Foundation Trust

Learning from Deaths

The Serious Incident Framework (2015) forms the basis for the Trust's Incident Policy which guides/informs the organisation about reporting, investigating and learning from incidents including deaths. The Learning from Deaths policy approved by the organisation in September 2017 supports and enhances this learning and investigation process. This is currently being revised in collaboration with other mental health and learning disability Trusts in the North of England.

We report all deaths of people with learning disabilities who are service users to the Learning Disabilities Mortality Review (LeDeR) Programme for further investigation, from which we have received no feedback to date.

During 2018/19 1,035 of Northumberland, Tyne and Wear NHS Foundation Trust's patients were reported to have died, with the majority of these being natural deaths in nature.

This comprised the following number of deaths which occurred in each quarter of that reporting period: 284 in the first quarter; 244 in the second quarter; 242 in the third quarter; 264 in the fourth quarter.

Of the 1,035 deaths, and in line with our Incident Policy – NTW (O) 05 and our Learning from Deaths Policy – NTW(C) 12, 225 of these deaths would fit the criteria for further investigation.

Of the 280 deaths subject to an investigation, 51 have been subject to or are currently subject to a mortality case record review and 229 have been or are currently subject to a level 1 (After Action Review) or level 2 (full serious incident) investigation.

By 11 April 2019, the following investigations were carried out and completed in each quarter, 76 in the first quarter; 67 in the second quarter; 60 in the third quarter and 67 in the fourth quarter, some of which remain under investigation and reports not completed due to the time frames.

Three deaths representing 0.28% of the patient deaths during 2018/19 are judged to be more likely than not to have been due to problems in the care provided to the patient.

In relation to each quarter, this consisted of:

0 representing 0.00% for the first quarter;

2 representing 0.82% for the second quarter;

1 representing 0.41% for the third quarter;

0 representing 0.00% for the fourth quarter.

These numbers have been estimated using the findings from Serious Incident investigations. Where there has been either a root or contributory cause found from the incident review then this has been used as a way to determine if the patient death may have been attributable to problems with care provided. There is currently no agreed or validated tool to determine whether problems in the care of the patient contributed to a death within mental health or learning disability services so we are using this approach until such a tool becomes available. This means that currently mental health and learning disability organisations are using differing ways of assessing this. The Royal College of Psychiatrists has developed a mortality review tool which the Trust is currently piloting along with other mental health and learning disability Trusts.

Over the last twelve months our investigations have identified five main areas of **learning**:

Risk assessment

It has been identified that when assessing the risk of the patient the FACE risk scoring is not correlating with the narrative of risk. Also when there is a change to the presentation of risk this is not being reflected in the risk management plan.

A Trust-wide review of FACE has been undertaken and a guide “FACE –Frequently Asked Questions” (March 2019) produced to guide staff to use the tool consistently. This is attached to the Care Co-ordination Policy NTW(C) 20. This has been published in the Safer Care Bulletin and a presentation arranged for the Learning and Improvement Group.

Physical health monitoring

The management of problems relating to physical health monitoring has been identified in several cases and includes policies not being followed and lack of awareness of clinical symptoms. Specifically, the prescribing of anti-psychotics with a patient who has a diagnosis of dementia and the recording of rationale for use has been highlighted

Venous Thromboembolism assessment and monitoring has also been identified as not always being carried out in an appropriate and timely fashion.

CAS alerts, learning bulletins and specific training sessions have been actioned to educate and raise staff awareness.

Safeguarding

Issues identified include a lack of understanding about the importance of raising Safeguarding alerts internally and the support and supervision that is available once this has been carried out. Also, a lack of awareness of the process of obtaining a forensic history from the police and the difference between local and national intelligence.

Safety Bulletins have been used to raise awareness and training for staff has been provided by the Safeguarding Team members working into the CBU's.

Clinical Judgement

Investigations have found that the rationale for choosing a specific treatment plan is not always documented appropriately. Teams should consider that the patients presentation is not static, and to have the space for discussion when there is a differing of conclusion about presentation and risk.

Staff are asked to reflect on incidents reviewed via team meetings and supervision.

Management of Waiting Lists

Several incidents have been reviewed where the patient was waiting for treatment. These cases have all been individual and waiting times vary between teams. However a trust wide project is currently underway and will be presented at a forth coming Quality Review Groups for to provide assurance for the Commissioners of mental health services.

Dissemination of Learning

Learning has been both trust wide and individual/team specific and the Trust uses a variety of methods to share the learning across the organisation. This includes discussing the learning within team meetings, learning groups and individual supervision of staff.

Making sure the learning becomes part of practice within the organisation and across the organisation is done in several different ways. The organisation has a variety of audit programmes running which will check if the learning from deaths is put into practice. Changes made from learning are introduced into policies which are regularly reviewed. Training programmes are changed and updated following learning from incident investigation findings. Teams have learning at the top of their agenda for meetings to ensure awareness raising is constantly maintained and becomes part of everyday culture. Learning groups use incident findings to inform their agendas to check out staffs understanding of learning and the impact on their service areas.

The Trust has developed a Safer Care monthly bulletin which disseminates lessons arising from investigations to all staff. The Central Alert System is used when a message is so important it needs to go across all the organisation very quickly.

NTW has introduced a formal Learning and Improvement Group to monitor all of the above and evaluate the impact of actions identified from incident and complaint investigations. This meeting is chaired jointly by the Executive Director of Nursing & Operations and Executive Medical Director, and can be accessed by staff from across the Trust using Skype.

We will commence reporting the number of case record reviews or investigations completed in-year which related to deaths during the previous year from 2018/19.

NHS Number and General Medical Practice Code Validity

Northumberland, Tyne and Wear NHS Foundation Trust submitted records during 2018/19 to the Secondary Uses service for inclusion in the Hospital Episode Statistics which are included in the latest published data for April 2018 to January 2019.

The percentage of records in the published data- which included the patient's valid NHS number was:

99.6% for admitted patient care; and 99.5% for outpatient care.

The percentage of records in the published data which included the patient's valid General Medical Practice Code was:

99.9% for admitted patient care; and 99.9% for outpatient care.

Data Security and Protection Toolkit attainment

The Northumberland, Tyne and Wear NHS Foundation Trust Data Security and Protection Toolkit submission for March 2019 was that we fully met 100 out of 100 assertions. In 2018/19 the Information Governance Toolkit was replaced by the Data Security and Protection Toolkit.

Clinical Coding error rate

Northumberland, Tyne and Wear NHS Foundation Trust was not subject to the Payment by Results clinical coding audit during 2018/19 by the Audit Commission.

Safe working hours for doctors in training

A report on safe working hours for doctors in training covering January to December 2018 was presented to the NTW Trust board in January 2019. The report is reproduced on page 85.

Performance against mandated core indicators

The mandated indicators applicable to Northumberland, Tyne and Wear NHS Foundation Trust are as follows:

The percentage of patients on Care Programme Approach (CPA) who were followed up within 7 days after discharge from psychiatric inpatient care during the reporting period (data governed by a national definition)

The Northumberland, Tyne and Wear NHS Foundation Trust considers that this data is as described for the following reason - we have established, robust reporting systems in place through our electronic patient record system (RiO) and adopt a systematic approach to data quality improvement.

The Northumberland, Tyne and Wear NHS Foundation Trust has taken the following actions to improve this percentage, and so the quality of its services by ensuring clinicians are aware of their responsibilities to complete these reviews.

Table 23: 7 day follow up data 2016/17 to 2018/19 (higher scores are better)

7 day follow up %	2016/17				2017/18				2018/19			
	Q1	Q2	Q1	Q2	Q1	Q2	Q1	Q2	Q1	Q2	Q3	Q4
NTW	99.1%	98.5%	99.1%	98.5%	99.1%	98.5%	99.1%	98.5%	97.1%	96.5%	96.7%	
National Average	97.0%	96.8%	97.0%	96.8%	97.0%	96.8%	97.0%	96.8%	95.8%	95.7%	95.5%

National Average	97.0%	97.4%	97.0%	97.4%	98.7%	98.6%	98.5%	98.7%	98.1%	98.4%	97.8%	
Highest national	100%	100%	100%	100%	100%	100%	100%	100%	100%	100%	100%	
Lowest national	48.5%	61.9%	48.5%	61.9%	88.9%	94.0%	84.3%	88.7%	85.1%	81.4%	78.8%	

Data source: [NHS England](#) (2018/19 Q4 published 10/05/2019)

The score from staff employed by, or under contract to, the trust during the reporting period who would recommend the trust as a provider of care to their family or friends

The Northumberland, Tyne and Wear NHS Foundation Trust consider that this data is as described for the following reasons – this is an externally commissioned survey.

The Northumberland, Tyne and Wear NHS Foundation Trust has taken the following actions to improve this score, and so the quality of its services by continuing to hold multidisciplinary staff engagement sessions at Trust and local levels regarding the results of the staff survey and identifying actions for improvement.

“If a friend or relative needed treatment I would be happy with the standard of care provided by this organisation”

Table 25: NHS staff survey data (question 21d)

% Agree or Strongly Agree	2016	2017	2018
NTW %	72%	68%	69%
National Average %	69%	70%	70%
Highest national %	95%	93%	95%
Lowest national %	45%	42%	36%

Data source: [Survey Coordination Centre](#)

‘Patient experience of community mental health services’ indicator score with regard to a patients experience of contact with a health or social care worker during the reporting period

The Northumberland, Tyne and Wear NHS Foundation Trust considers that this data is as described for the following reasons – this is an externally commissioned survey.

The Northumberland, Tyne and Wear NHS Foundation Trust has taken the following actions to improve this score, and so the quality of its services by constantly engaging with service users and carers to ensure we are responsive to their needs and continually improve our services.

Table 26: Community Mental Health survey scores, 2016 to 2018

Health and social care workers	2016	2017	2018
NTW	7.7	7.6	7.4
National Average	7.3	7.2	7.1
Highest national	8.0	8.0	7.7
Lowest national	6.5	6.0	5.9

(score out of 10, higher are better). Scores based on same two questions used in 2018

Data source: [CQC](#)

The number and, where available the rate of patient safety incidents reported within the trust during the reporting period, and the number and percentage of such patient safety incidents that resulted in severe harm or death (data governed by a national definition)

The Northumberland, Tyne and Wear NHS Foundation Trust considers that this data is as described for the following reasons – this is data we have uploaded to the National Reporting and Learning System (NRLS).

The Northumberland, Tyne and Wear NHS Foundation Trust has taken the following actions to improve this rate/number/percentage, and so the quality of its services by ensuring all serious Patient Safety Incidents are robustly investigated and lessons shared throughout the organisation (including the early identification of any themes or trends).

Table 27: Patient Safety Incidents, National Reporting and Learning System

Indicator	Performance	2016/17 Apr-Sep	2016/17 Oct-Mar	2017/18 Apr-Sep	2017/18 Oct-Mar	2018/19 Apr-Sep	2018/19 Oct-Mar

*note that some organisations report zero patient safety incidents, national average for mental health trusts

Part 3

Review of Quality Performance

In this section we report on the quality of the services we provide, by reviewing progress against indicators for quality improvement, including the NHS Improvement Single Oversight Framework, performance against contracts with local commissioners, statutory and mandatory training, staff sickness absence and staff survey results.

We have reviewed the information we include in this section to remove duplication and less relevant data compared to previous quality accounts. We have included key measures for each of the quality domains (safety, service user experience and clinical effectiveness) that we know are meaningful to our staff, our Council of Governors, commissioners and partners.

NHS Improvement Single Oversight Framework

The NHS Improvement Single Oversight Framework identifies NHS providers' potential support needs across five themes:

- quality of care
- finance and use of resources
- operational performance
- strategic change
- leadership and improvement capability

Individual trusts are “segmented” by NHS Improvement according to the level of support each trust needs. In 2018/19 NTW has been assigned a segment of “1 – maximum autonomy”.

Table 28: Self-assessment against the Single Oversight Framework as at March 2019
(previous year data in brackets where available)

	Period	Trustwide	Newcastle Gateshead CCG	Northumberland CCG	North Tyneside CCG	South Tyneside CCG	Sunderland CCG	
Patient Safety Quality Indicators								
Admissions to adult facilities of patients under 16	2018/19 (2017/18)	0 (0)	0 (0)	0 (0)	0 (0)	0 (0)	0 (0)	
CPA follow up - proportion of discharges from hospital followed up within 7 days	2018/19 (2017/18)	96.8% (97.2%)	95.3% (96.3%)	99.0% (98.1%)	97.9% (96.1%)	95.1% (97.4%)	97.8% (98.6%)	
Inappropriate Out of Area Placements average beddays per month	2018/19 (2017/18 Q4 avg.per month)	40 (16)	11 (28)	6 (0)	8 (13)	1 (0)	14 (7)	
Clinical Effectiveness Quality Indicators								
% clients in settled accommodation	2018/19 (2017/18)	80.7% (77.3%)	82.8% (79.9%)	80.9% (74.7%)	84.5% (79.8%)	77.9% (81.9%)	81.4% (73.9%)	
% clients in employment	2018/19 (2017/18)	6.7% (6.5%)	5.9% (6.3%)	8.7% (8.9%)	7.2% (6.8%)	9.0% (4.7%)	5.2% (4.3%)	
Ensure that cardio-metabolic assessment and treatment for people with psychosis is delivered routinely in the following service areas:								
• Inpatient wards	2018/19 (31/03/2018)	98.4% (85.0%)						
• Early intervention in psychosis services	2018/19 (31/03/2018)	90.7% (76.7%)						
• Community mental health services (people on care programme approach)	2018/19 (31/03/2018)	98.2% (58.8%)						
Data Quality Maturity Index (DQMI)	Qtr2 '18/19 (Qtr2 17/18)	95.8% (91.7%)						
IAPT- Proportion of people completing treatment who move to recovery	March 2018 (Qtr4 16/17)	55.3% (52.4%)						55.3% (52.4%)
Service User Experience Quality Indicators								
RTT Percentage of Incomplete (unseen) referrals waiting less than 18 weeks*	2018/19 (2017/18)	100% (99.6%)	100% (98.6%)	100% (100%)	100% (100%)	100% (100%)	100% (100%)	
People with a first episode of psychosis begin treatment with a NICE recommended care package within two weeks of referral	2018/19 (2017/18)	79.6% (83.9%)	66.7% (76.7%)	75.3% (81.6%)	80.8% (74.0%)	92.2% (95.7%)	98.6% (95.1%)	
IAPT Waiting Times to begin treatment – incomplete								
• 6 weeks	March 2019 (March 18)	99.2% (99.6%)						99.2% (99.6%)
• 18 weeks	March 2019 (March 18)	99.8% (100%)						99.8% (100%)

Data source: NTW. *Note that this relates only to a small number of consultant-led services

Performance against contracts with local commissioners

During 2018/19 the Trust had a number of contractual targets to meet with local clinical commissioning groups (CCG's). Table 26 below highlights the targets and the performance of each CCG against them for quarter four 2018/19 (1 January 2019 to 31 March 2019).

Table 29: Contract performance targets 2017/18 Quarter 4 (2017/18 Quarter 4 in brackets)

CCG Contract performance targets Quarter 4 2017/18 (target in brackets)	Newcastle Gateshead CCG	Northumberland CCG	North Tyneside CCG	Sunderland CCG	South Tyneside CCG
CPA Service Users reviewed in the last 12 months (95%)	97.5% (97.4%)	98.0% (93.3%)	97.0% (95.8%)	98.7% (98.0%)	98.0% (98.1%)
CPA Service Users with a risk assessment undertaken/reviewed in the last 12 months (95%)	98.2% (99.0%)	97.2% (95.8%)	97.5% (93.5%)	97.8% (99.5%)	98.1% (98.5%)
CPA Service Users with identified risks who have at least a 12 monthly crisis and contingency plan (95%)	96.0% (96.3%)	97.1% (93.6%)	96.6% (93.4%)	95.0% (95.6%)	96.2% (95.9%)
Number of inpatient discharges from adult mental health illness specialties followed up within 7 days (95%)	96.1% (97.1%)	98.3% (97.8%)	97.1% (96.1%)	96.2% (100%)	95.2% (100%)
Current delayed transfers of care -including social care (<7.5%)	1.7% (1.5%)	4.0% (2.6%)	2.4% (0.0%)	3.2% (0.9%)	4.6% (3.2%)
RTT percentage of incomplete (unseen) referrals waiting less than 18 weeks (92%) <small>Note that this relates only to a small number of consultant-led services</small>	100% (98.6%)	100% (100%)	100% (100%)	100% (100%)	100% (100%)
Current service users aged 18 and over with a valid NHS Number (99%)	99.9% (99.9%)	99.9% (99.7%)	99.9% (99.8%)	100% (99.7%)	100% (99.9%)
Current service users aged 18 and over with valid Ethnicity completed (90%)	93.5% (91.8%)	94.1% (93.9%)	92.9% (92.7%)	94.7% (96.2%)	90.6% (95.5%)
The number of people who have completed IAPT treatment during the reporting period (50%)	n/a	n/a	n/a	54.3% (54.9%)	n/a

	Performance at or above target
	Performance within 5% of target
	Under Performance greater than 5%

Staff Absence through Sickness Rate

High levels of staff sickness impact on service user care: therefore the Trust monitors sickness absence levels carefully.

Figure 22: Monthly staff sickness, NTW and national, April 2016 to November 2018

Data source: NHS Digital, Electronic Staff Record. Data includes NTW Solutions, a wholly owned subsidiary company of NTW.

The Trust's workforce strategy outlines the corporate approach to the management of absence including a management skills development programme and masterclasses which have a focus on managing absence.

There is also a strong focus on health and wellbeing which is highlighted in the 5 year Health and Wellbeing strategy; this was implemented in 2015 and refreshed in 2017. This strategy not only enables the Trust to support staff but allows us to understand better the health needs of our staff and encourages staff to take responsibility for their own health.

We continue to hold the Better Health at Work Award at Maintaining Excellence Level and work in accordance with

Investors in People standards. In addition the Trust has signed the Time to Change Pledge to demonstrate our commitment to removing stigma associated with mental health issues.

Staff Survey

Since 2010 the Trust has adopted a census approach to the Staff Survey. Whilst the results listed here are relating to the National Survey, our action planning also takes into account the findings from our census report as well as themes identified from the free text comments.

The Trust in the past five years and as a direct consequence of staff survey findings has been working on improving its approach to staff engagement. We have developed a schedule of listening events called Speak Easy where Senior Managers listen to the views of staff across the Trust, with a focus on empowering people to be able to take action to improve matters at a local level. Staff Survey results are disseminated widely throughout the Trust with presentation of key findings at meetings with Trust Board, Corporate Decisions Team, Business Development Group, Council of Governors, Staff Side and Corporate and Operational Directorates throughout the Trust. At each of these meetings views are sought on our intentions to take action on issues highlighted in the survey results. The Trust wide Staff Survey Action Plan is agreed by Trust Board and is monitored through the Trust's Corporate Decisions Team (Workforce) Group. In addition localities also develop their own specific action plans which are monitored through local assurance groups.

Table 31: NHS staff survey responses 2016 to 2018

Response rate	2016	2017	2018
Trust	46%	64%	67%
National Average (Mental Health/Learning Disability)	50%	52%	51%

From 2018 onwards, the results from questions are grouped to give scores in ten indicators. The indicator scores are based on a score out of 10 for certain questions with the indicator score being the average of those. Scores for each indicator together with that of the survey benchmarking group Mental Health /Learning Disability Trusts are presented below.

Table 32: Response scores by theme, Staff Survey 2016 to 2018

Theme	2016		2017		2018	
	NTW	Benchmarking Group	NTW	Benchmarking Group	NTW	Benchmarking Group
Equality, diversity and inclusion	9.4	9.0	9.3	9.0	9.4	9.0
Health and wellbeing	6.6	6.2	6.6	6.2	6.6	6.2
Immediate managers	7.3	7.1	7.5	7.2	7.3	7.1

Theme	2016		2017		2018	
	NTW	Benchmarking Group	NTW	Benchmarking Group	NTW	Benchmarking Group
Morale						
Quality of appraisals	5.9	5.5	5.9	5.5	5.9	5.5
Quality of care	7.7	7.4	7.5	7.3	7.7	7.4
Safe environment – bullying and harassment	8.3	8.0	8.3	8.0	8.3	8.0
Safe environment – violence	9.0	9.2	8.9	9.2	9.0	9.2
Safety culture	7.0	6.6	7.0	6.7	7.0	6.6
Staff engagement	7.2	6.9	7.1	7.0	7.2	6.9

Data source (*Table 31 to Table 32*): [Survey Coordination Centre](#). Data includes NTW Solutions, a wholly owned subsidiary company of NTW.

Actions

The following are suggested actions subject to approval

- Consider ways to further improve the staff engagement score. Look at how staff engagement can be prioritised across other areas which are covered by this survey.
- Continue to identify any concentrations of staff who feel they have been discriminated against. Actions to form part of EDI Group work.
- Continue to prioritise the issue of reported physical deterioration and stress at work and analyse ways in which we can meet problems - while scores have improved there are still a number of staff who are experiencing this.
- Look to reinforce the positive view of commitment from staff and being aware that this should not come at a cost to their own health and wellbeing.
- Continue to prioritise the development of line managers. Consider how this links directly to some of the other areas covered in the survey.
- Ensure that line managers are able to make the link between the Trust's goals and how staff fit in with this.
- Ensure that managerial and supervisory roles include the duty to give feedback to staff including both positive and negative comments as appropriate.
- Look what we can do to improve how involved staff feel in changes that happen in their area of work. Communication is key.

Statements from Clinical Commissioning Groups (CCG), local Healthwatch and Local Authorities

We have invited our partners from all localities covered by Trust Services to comment on our Quality Account.

South Tyneside Council Overview and Scrutiny Committee's statement:

Thank you for the opportunity to comment on your 18/19 Quality Report.

We have not asked representatives of NTW to attend any of our scrutiny committees this year as our programme has been very much focussed once again on the "Path to Excellence" programme.

We had intended to look at the Learning Disability Transformation Programme in our schedule for this year but that has not been possible. It will be scheduled in for early in 19/20.

As regards the report itself, we continue to appreciate the high performance standards that the Trust is maintaining in many areas. However, whilst we acknowledge the progress you have made over the waiting times for Child and Adolescent Mental Health Services, we continue to believe that no child should wait more than 9 weeks for services. We understand that driving waiting times down is tough task against the financial, workforce and workload

pressures that the Trust are operating under. But we do believe that this is very important so we are therefore pleased that waiting times continue to remain in your priorities for 19/20.

It is concerning that the number of patient safety incidents has continued to grow but we have some assurance that the Trust is treating this issue very seriously through the very open approach you are taking and the governance changes that are being made through learning from previous incidents.

We are assured that NTW is a high performing, caring and very self-aware organisation who are focussing on continuous improvement.

I hope these comments are helpful.

Yours sincerely

Cllr Rob Dix

Chair, South Tyneside Council Overview and Scrutiny Coordinating and Call-in Committee

Annual report on safe working hours: doctors in training

This report covering the period January to December 2018 was presented to the Trust Board in January 2019

Executive summary

All new Psychiatry Trainees and GP Trainees rotating into a Psychiatry placement from 2nd August 2017 are on the New 2016 Terms and Conditions of Service. There are currently 117 trainees working into NTW with 96 on the new Terms and Conditions of Service via the accredited training scheme via Health Education England. There are an additional 26 trainees employed directly by NTW working as Trust Grade Doctors or Teaching Fellows. (Total 143).

Introduction

This is the Annual Board report on Safe Working Hours which focuses on Junior Doctors. The process of reporting has been built into the new junior doctor contract and aims to allow trusts to have an overview of working practices of junior doctors as well as training delivered.

The new contract is gradually implemented by being offered to new trainees' as they take up training posts, in effect this will mean for a number of years we will have trainees employed on two different contracts. It is also of note that although we host over 160 trainee posts, we do not directly employ the majority of these trainees, also due to current recruitment challenges a number of the senior posts are vacant.

High level data

Number of doctors in training (total): 117 Trainees (at December 2018)

Number of doctors in training on 2016 Terms and Conditions of Service (total): 96 Trainees (December 2018)

Amount of time available in job plan for guardian to do the role: This is being remunerated through payment of 1 Additional Programmed Activity

Admin support provided to the guardian (if any): Ad Hoc by MedW Team

Amount of job-planned time for educational supervisors: 0.5 PAs per trainee

New Trust Guardian of Safeworking: Dr Clare McLeod

Exception reports (with regard to working hours)

Total	36	12	5	7	12	34	2

Work schedule reviews

During the year there have been 36 Exception Reports submitted from Trainees; the outcome of which was that TOIL was granted for 27 cases, 5 no action required, 2 cases were not agreed and payment was made on 2 occasions. Emergency Rota cover is arranged when no cover can be found from either Agency or current trainees. The Rota's are covered by 2 trainees rather than 3 and payment is made to the 2 trainees providing cover at half rate.

Vacancy	3	2	4	1
Sickness/other	4	11	19	11
Total	7	13	23	12

e) Fines

There was 1 fine during the year. This was due to inadequate rest between shifts due to working late following emergency admissions at St George's Park. The doctor has received payment accordingly and the Guardian has issued a fine to the service of £383.96. At the Junior Doctor Forum agreement was reached to purchase books to assist trainees sitting CASC exams.

Qualitative information:

Very low numbers of Exception Reports continue despite efforts to raise the profile at Junior Doctor Forums and Induction. Guardian of Safe-working and Medical Staffing Representative are attending various sites to meet with trainees following teaching to raise awareness of Exception

Reporting. Dates have been added to the calendar for 2019.

Issues arising

There have been 17 IR1s submitted for Insufficient Medical Handover since the system was introduced in May 2018 which relate to insufficient handover when a patient is admitted to hospital.

Some trainees find attending the Junior Doctors Forum difficult on a Friday, due to other clinical and training commitments.

The BMA have produced the Fatigue and Facilities charter which outlines steps to promote better working conditions for doctors to reduce fatigue, improve safety and provide more efficient care.

Matt Hancock, Secretary of State for Health and Social Care, has allocated funds to be spent by the Guardian of each trust specifically to improve the working conditions for junior doctors. These funds are contingent on trusts agreeing to the principles outlined in the BMA Fatigue and Facilities charter.

Actions taken to resolve issues:

The Director of Medical Education has reviewed and summarised the IR1s submitted for Insufficient Medical Handover up until November 2018. This summary has been circulated to all medical staff and crisis team managers in the trust. The guidance of when to submit an IR1 has again been circulated to all medical staff and the crisis teams. The Guardian and Medical Staffing representative have met with trainees at HWP and SGP to explain about when and how to submit an IR1 form for Insufficient Medical Handover and have arranged to visit trainees at CAV in January 2019.

The number of IR1s submitted has increased since the Guardian visits to trainees. These will continue to be reviewed and reported through the forum and report to the Board. IR1s with both possible reporting codes (PC12: Insufficient Medical Handover and SD08: Poor Transition of Care) are now included in the reports which are sent to the Guardian, DME and Medical Staffing Manager.

The Forum now alternates between a Thursday and a Friday. Following feedback from trainees, it was agreed that a room with a large screen set up with skype would be arranged so that trainees could join the forum together. This will be piloted at HWP for the meeting on 10th January.

The profile of Exception Reporting continues to be raised through the Junior Doctor Forum, at Induction for new doctors and at visits to trainees. The document "What is Work" which is guidance as to when it would be appropriate to raise an Exception Report, originally developed by the Guardians of Safe Working across the Region has been updated following discussions in the Junior Doctors Forum and is now on the trust intranet. The Guardian has shared the document with all trainees in the trust and will continue to use it at Induction. The Guardian and the Medical Staffing Team have met with trainees at HWP on 7th November and SGP on 10th December to raise awareness of Exception Reporting. There are dates to meet trainees rotating through four trust sites on a monthly basis, arranged at times to coincide with training; the next meeting is at CAV on 31st January.

At the Guardian Forum on 16th November, it was confirmed that the trust agrees in principle with the BMA Fatigue and Facilities charter. It was agreed that a working group be formed to review the charter, to agree

the points which were relevant to this trust and to add any additional points more specific to NTW. The first meeting was held on 17th December. The charter was agreed in the main. The Guardian will ensure that information relating to the importance of taking breaks is conveyed at Induction and review the information given about safety when travelling to trust sites out of hours and about changing facilities and showers.

Rest facilities for trainees to use when on duty and to sleep after a night shift to ensure safety to drive home were discussed in this working group. The current facilities are shared with day-time teams and need to be vacated at 9am. The difficulty identifying appropriate accommodation was discussed. It was proposed that the money received on the adoption of the charter could be used to fund appropriate rest facilities and it was suggested that this could be the purchase of pods which would be directly accessed from trust buildings for the sole use of junior doctors to provide appropriate rest facilities. The Director of Workforce Planning will write to Mr. Hancock to enquire about the likely amount the trust would have to spend on improving conditions for junior doctors, on acceptance of the charter, to inform the discussions about how best to use these funds. This will continue to be discussed through the Forum.

Summary

Work is continuing to promote the importance of Exception Reporting and emphasise that it is a positive process.

The process to record episodes of Insufficient Medical Handover is now established and will continue to be reviewed at the Guardian Forum. A summary of reports submitted to date and the guidance

has been shared with all medical staff and crisis team managers.

The Guardian and medical staffing representatives have arranged monthly meetings with trainees rotating through four trust sites to discuss Exception Reporting, medical handover and for any other issues that arise.

It is hoped that by alternating the day of the forum and through the use of Skype, attendance at the Forum can be facilitated and allow more trainees to attend.

Through the Guardian Forum, the BMA Fatigue and Facilities charter is being reviewed. It has been accepted in principle and a working group has been convened to look at trust specific issues to add to or amend the document. Once adopted, we understand that the trust would receive funds from the Secretary of State for Health and Social Care to be spent by the Guardian to improve the working conditions for junior doctors.

Dr Clare McLeod

Trust Guardian of Safeworking

Appendix 4

Further information on the Points of You experience survey

Points of You is a survey designed with service user and carer involvement to capture feedback about their experience of the care and treatment provided. The survey is composed of 10 questions to help Northumberland, Tyne and Wear NHS Foundation Trust make improvements in specific areas. NHS England requires us to ask the 'Friends and Family Test' question which is also included in the Points of You survey as the first question.

Service user and carer experience is an important indicator of service quality, and only by asking our service users and carers about their experience can we monitor and continuously improve the quality of our services. All service users and carers should have the opportunity to provide feedback of their experience. It is important to hear from all service users and carers who are accessing or have recently accessed our inpatient, community and outpatient services.

Points of You can be completed as a hard copy that should be freely available in all clinical areas, online at www.ntw.nhs.uk/poy, or through a survey posted out to service users.

The questions we ask are:

1. How likely are you to recommend our team or ward to friends and family if they needed similar care or treatment?
2. How kind and caring were staff to you?
3. Were you encouraged to have your say in the treatment or service received and what was going to happen?
4. Did we listen to you?
5. If you had any questions about the service being provided did you know who to talk to?
6. Were you given the information you needed?
7. Were you happy with how much time we spent with you?
8. Did staff help you to feel safe when we were working with you?
9. Overall did we help?
10. Is there anything else you would like to tell us about the team or ward? (You can also use this space to tell us more about any of the questions on this survey)

Appendix 7

Glossary

ADHD	Attention Deficit Hyperactivity Disorder – a group of behavioural symptoms that include inattentiveness, hyperactivity and impulsiveness
AIMS	Accreditation for Inpatient Mental health Services
ASD	Autism Spectrum Disorder – a term used to describe a number of symptoms and behaviours which affect the way in which a group of people understand and react to the world around them
CAMHS	Children and Adolescent Mental Health Services
CCG	Clinical Commissioning Group – a type of NHS organisation that commissions primary, community and secondary care from providers
CAS alert	The Central Alerting System is a web-based cascading system for issuing patient safety alerts, important public health messages and other safety critical information and guidance to the NHS.
CCQI	College Centre for Quality Improvement – part of the Royal College of Psychiatrists, working with services to assess and increase the quality of care they provide.
CMHT	Community Mental Health Team – supports people living in the community who have complex or serious mental health problems
Commissioner	Members of Clinical Commissioning Groups (CCGs), regional and national commissioning groups responsible for purchasing health and social care services from NHS Trusts.
Coram Voice	A charity that enables and equips children and young people to hold to account the services that are responsible for their care.
CQUIN	Commissioning for Quality and Innovation – a scheme whereby part of our income is dependent upon improving quality
CMHT	Community Mental Health Team
CRHT	Crisis Resolution Home Treatment – a service provided to service users in crisis.
Clinician	A healthcare professional working directly with service users. Clinicians come from a number of healthcare professions such as psychiatrists, psychologists, nurses and occupational therapists.
Cluster / Clustering	Mental health clusters are used to describe groups of service users with similar types of characteristics.
CQC	Care Quality Commission – the independent regulator of health and adult social care in England. The CQC registers (licenses) providers of care services if they meet essential standards of quality and safety and monitor them to make sure they continue to meet those standards.
CPA	Care Programme Approach – a package of care for some service users, including a care coordinator and a care plan.
CTO	Community Treatment Order

CYPS	Children and Young Peoples Services – also known as CAMHS
Dashboard	An electronic system that presents relevant information to staff, service users and the public
DOLS	Deprivation Of Liberty Safeguards – a set of rules within the Mental Capacity Act for where service users can't make decisions about how they are cared for.
Dual Diagnosis	Service users who have a mental health need combined with alcohol or drug usage
ECT	Electroconvulsive therapy
EIP	Early Intervention in Psychosis
Forensic	Forensic teams provide services to service users who have committed serious offences or who may be at risk of doing so
GP	General Practitioner – a primary care doctor
HMP	Her Majesty's Prison
HoNOS / HoNOS 4-factor model	Health of the Nation Outcome Scales. A clinical outcome measuring tool.
IAPT	Improving Access to Psychological Therapies – a national programme to implement National Institute for Health and Clinical Excellence (NICE) guidelines for people suffering from depression and anxiety disorders.
LD	Learning Disabilities
LeDeR	The Learning Disabilities Mortality Review Programme aims to make improvements in the quality of health and social care for people with learning disabilities, and to reduce premature deaths in this population.
Lester Tool	The Lester Positive Cardiometabolic Health Resource provides a simple framework for identifying and treating cardiovascular and type 2 diabetes risks in service users with psychosis receiving antipsychotic medication.
MARAC	Multi-Agency Risk Assessment Conference – a risk management meeting for high risk cases of domestic violence and abuse
MDT	Multi-Disciplinary Team – a group of professionals from several disciplines who come together to provide care such as Psychiatrists, Clinical Psychologists, Community Psychiatric Nurses and, Occupational Therapists.
MHA	Mental Health Act
MHCT	Mental Health Clustering Tool – a computerised system used in clustering
NHS Improvement	The independent regulator of NHS Foundation Trusts, ensuring they are well led and financially robust.

Single Oversight Framework	An NHS Improvement framework for assessing the performance of NHS Foundation Trusts (replacing the Monitor Risk Assessment Framework)
NEQOS	North East Quality Observatory System – an organisation that helps NHS Trusts to improve quality through data measurement
NICE	National Institute for Health and Clinical Excellence – a group who produce best practice guidance for clinicians
NIHR	National Institute of Health Research – an NHS organisation undertaking healthcare related research
NRLS	National Reporting and Learning System – a system for recording patient safety incidents, operated by NHS Improvement
NTW	Northumberland, Tyne and Wear NHS Foundation Trust
Out of area placements	Service users admitted inappropriately to an inpatient unit that does not usually receive admissions of people living in the catchment of the person's local community mental health team.
Pathway	A service user journey through the Trust, people may come into contact with many different services
PHSO	The Parliamentary And Health Service Ombudsman
PICU	Psychiatric Intensive Care Unit
Points of You	An NTW service user and carer feedback system that allows us to evaluate the quality of services provided. For more information on Points of You please see page 90.
POMH-UK	Prescribing Observatory for Mental Health – a national organisation that helps mental health trusts to improve their prescribing practice.
PMVA	Prevention and Management of Violence and Aggression
Recovery College	Recovery Colleges take an educational approach to provide a safe space where people can connect, gain knowledge and develop skills.
RiO	NTW's electronic patient record
RTT	Referral To Treatment – used in many waiting times calculations
Serious Incident	An incident resulting in death, serious injury or harm to service users, staff or the public, significant loss or damage to property or the environment, or otherwise likely to be of significant public concern. This includes 'near misses' or low impact incidents which have the potential to cause serious harm.
Transition	When a service user moves from one service to another, for example from an inpatient unit to being cared for at home by a community team.
